# Forgeline — BigCommerce Theme

Installation and setup guide

Forgeline is a BigCommerce Stencil theme for electronics, computers and accessories stores with large catalogues. It ships in three colour variations (Graphite, Volt and Workshop) and is set up from BigCommerce's theme editor.

### In your download

- Forgeline-1.0.0.zip — the theme bundle you upload to BigCommerce
- Installation-Guide.pdf — this guide
- README.txt and LICENSE.txt

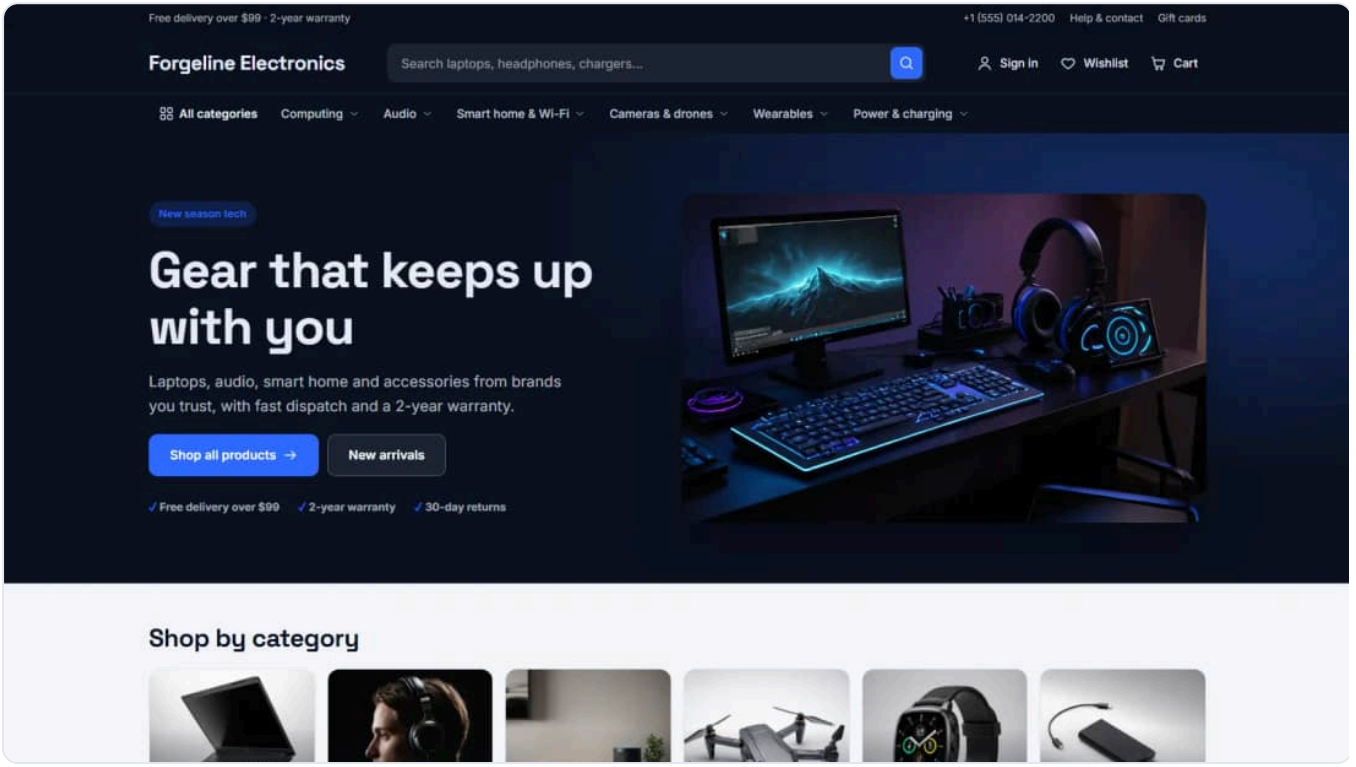

### You will need

- A BigCommerce store on any plan
- Categories with images and some products
- About 20 minutes

Version 1.0.0 · October 2026 · Live demo: https://coodecraft.com/demos/forgeline-bigcommerce-theme/index.html

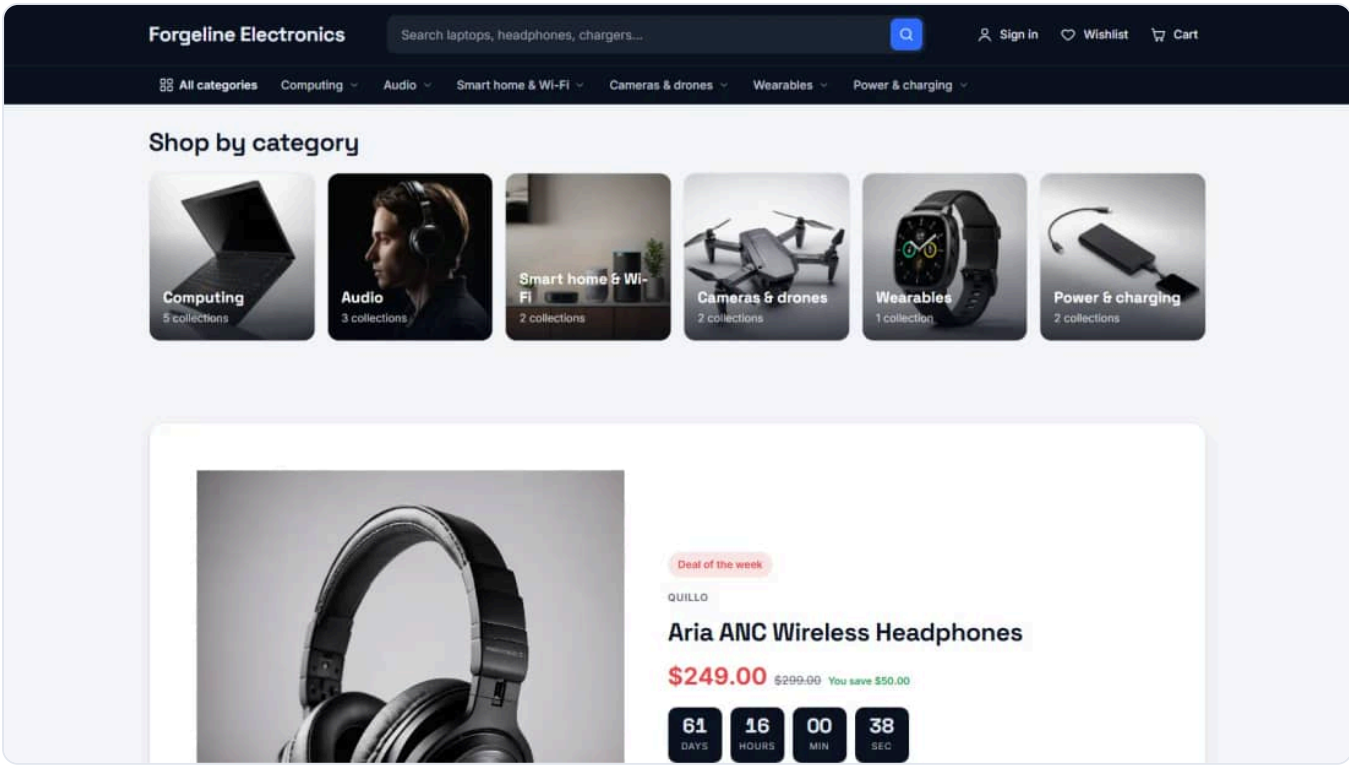

## 1 Upload the theme

1. In BigCommerce admin open Storefront → Themes.
2. Click Upload Theme and choose Forgeline-1.0.0.zip from your download (not the outer download zip).
3. BigCommerce processes the bundle (usually under a minute). Forgeline then appears under My Themes.
4. Choose a variation (Graphite, Volt or Workshop) and click Apply, or Customize first to preview.

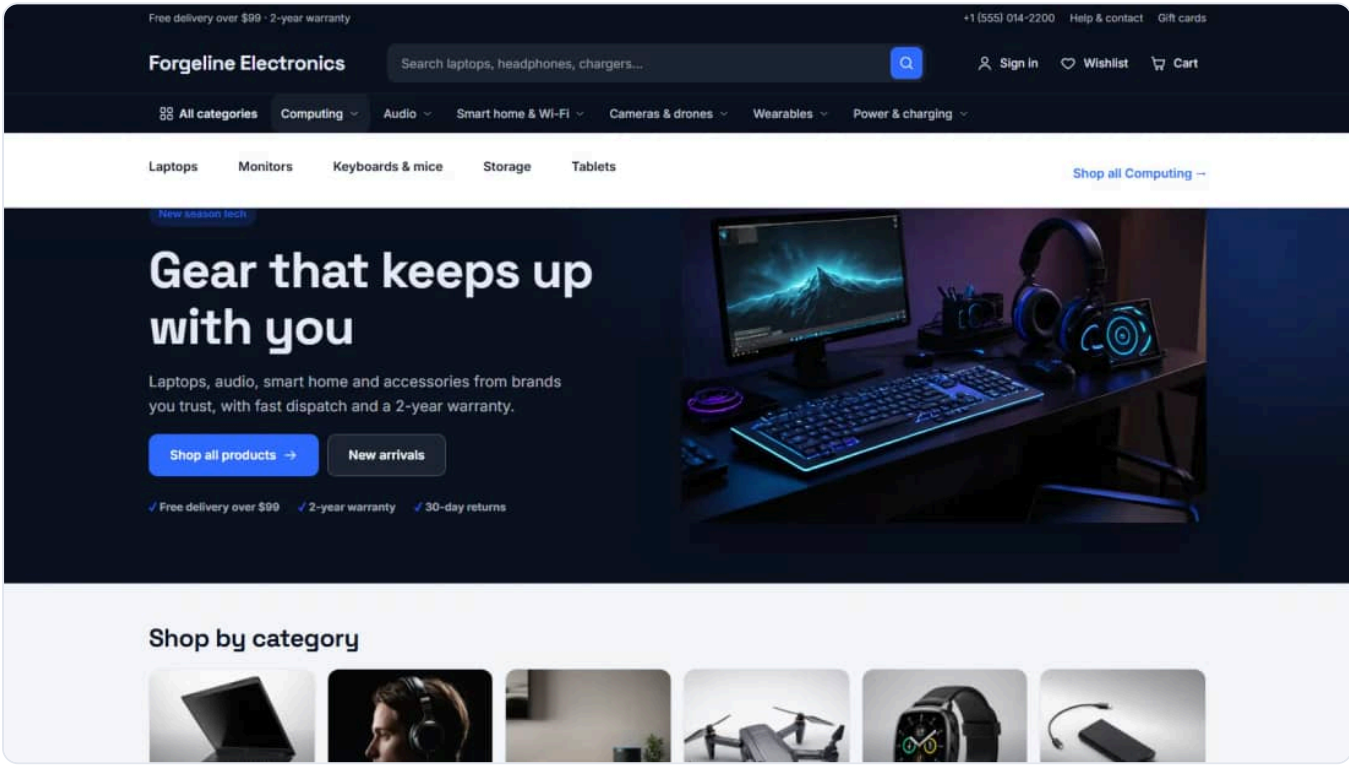

## 2 Colours, fonts and the hero

1. Storefront → Themes → Customize opens the theme editor.
2. Colours: page, cards, header, primary button and sale badge colours.
3. Typography: body and heading fonts, and the corner radius.
4. Home page: hero badge, heading, text, button and image. To use your own hero image, upload it with WebDAV to the content folder and set Hero image to webdav:your-file.jpg (the default is img/hero.jpg). Tick 'Show my carousel slides' to use Storefront → Carousel instead.

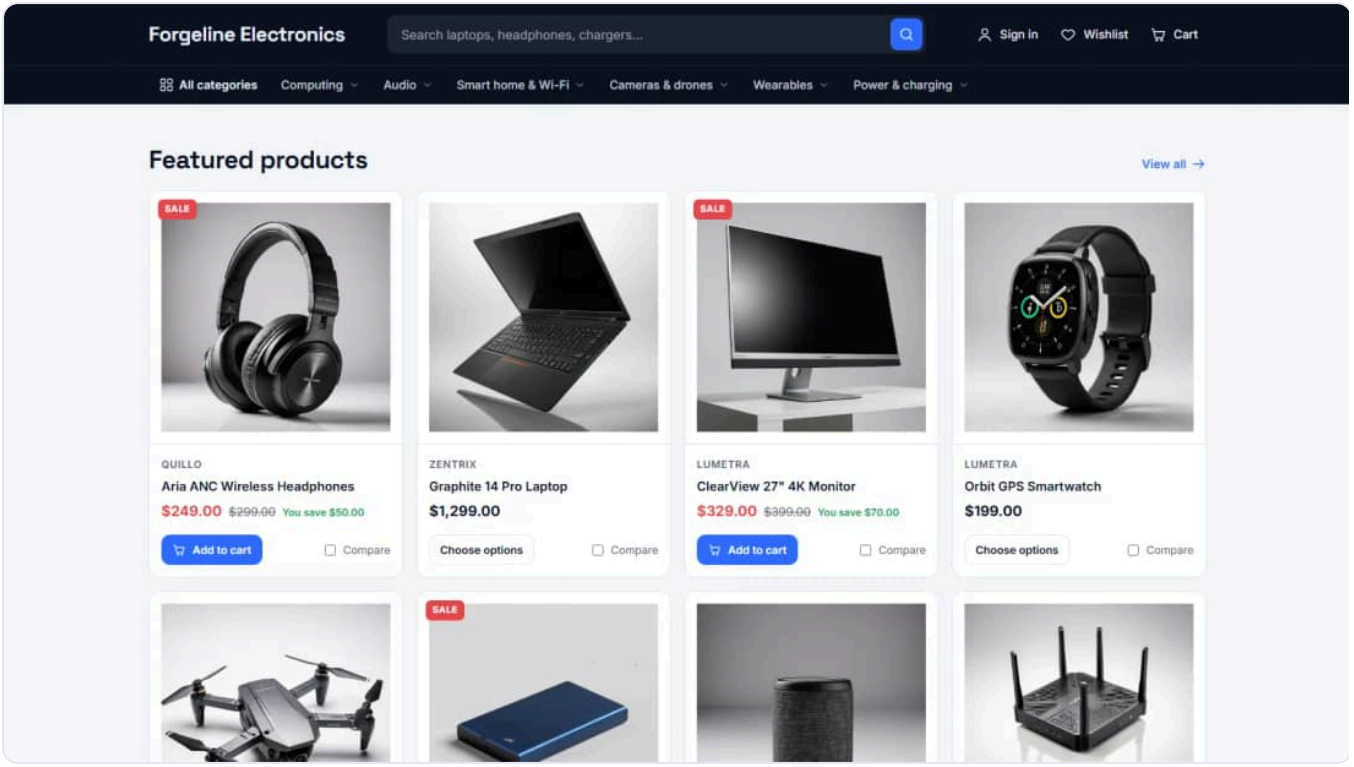

## 3 Categories and the mega menu

1. Products → Product Categories. Top-level categories appear in the navigation bar and as image tiles on the homepage, so give each one an image.
2. Subcategories appear in the mega menu under their parent, and as chips at the top of the category page.

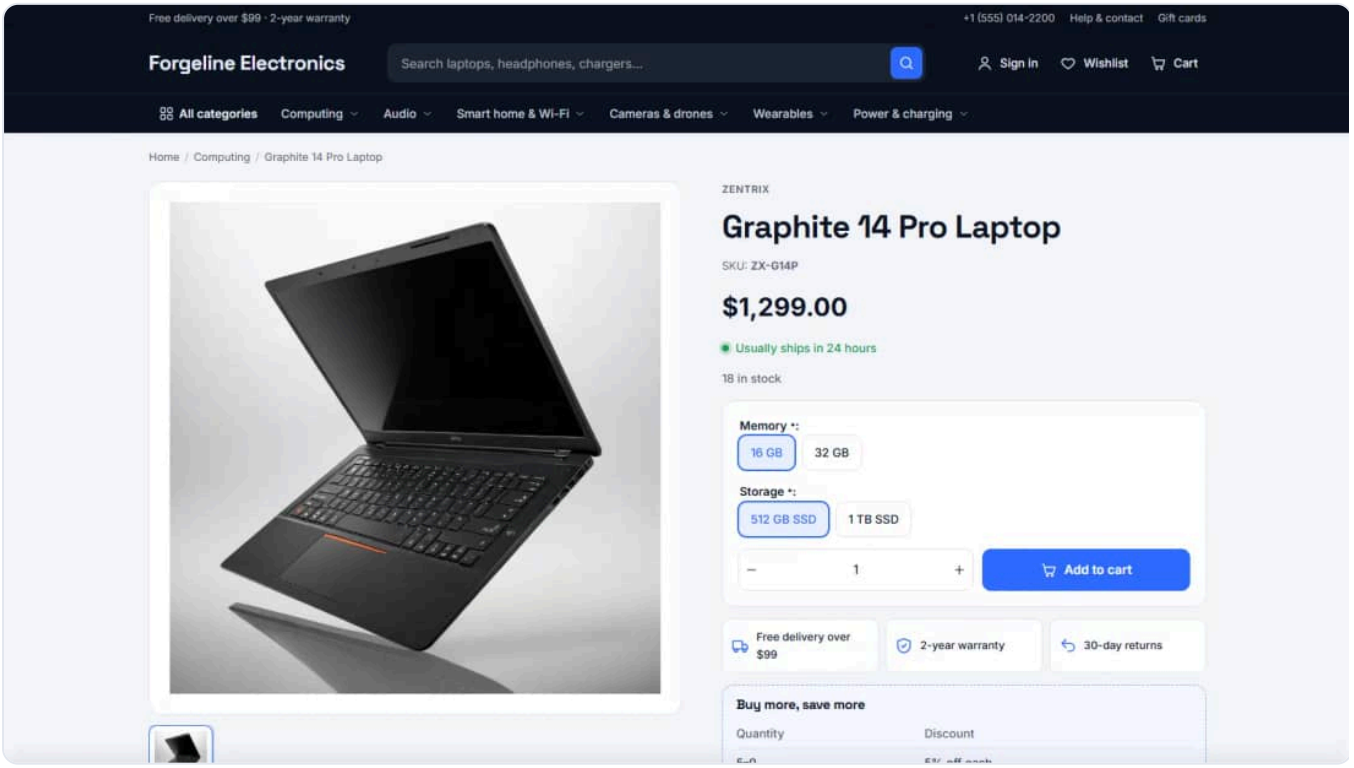

## 4 Deal of the week and product rows

1. Mark products as Featured (Products → edit → Featured product). The first featured product becomes the Deal of the week.
2. In the theme editor, Home page → Deal ends sets the countdown end date and time (format 2026-12-31T23:59:59).
3. Choose how many Featured, New and Best-seller products each row shows.

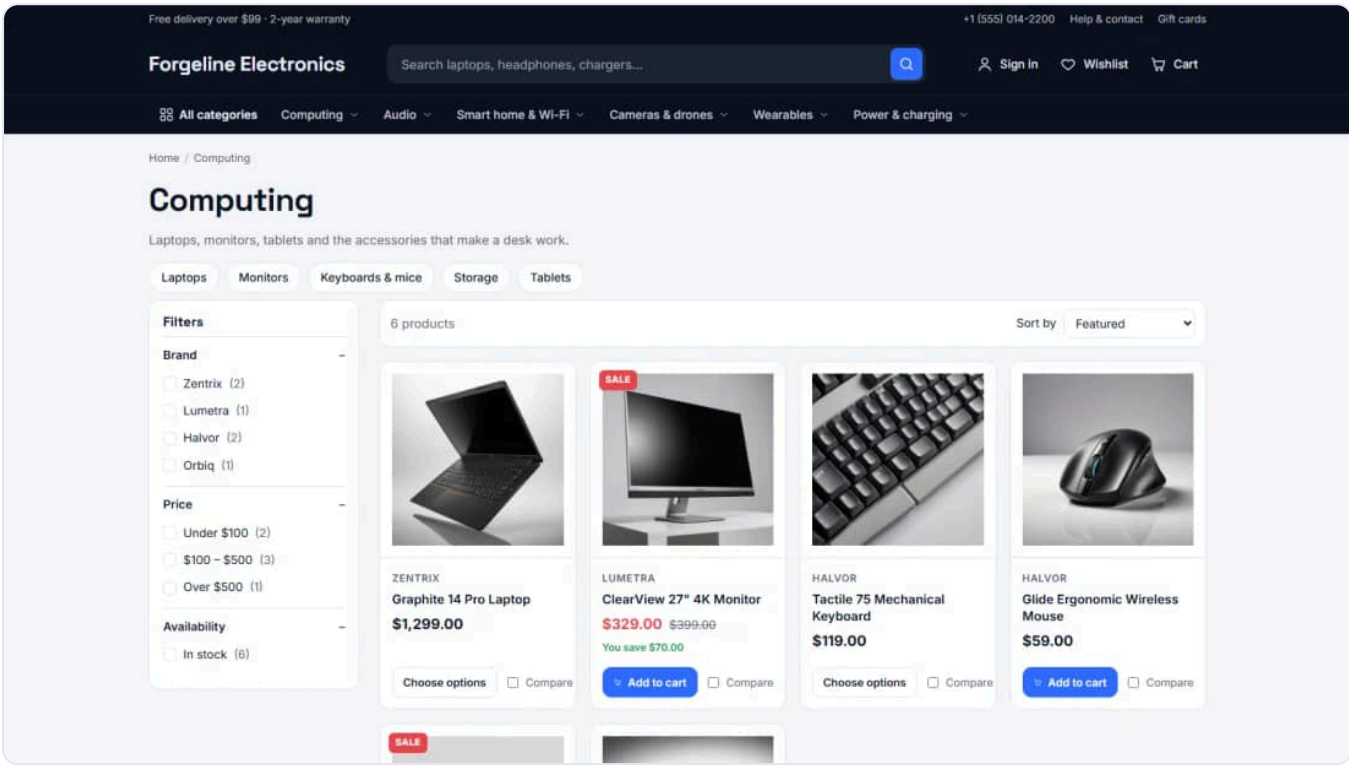

## 5 Product pages: specs and bulk pricing

1. Custom Fields (Products → edit → Custom Fields) show in the Specifications tab, e.g. Display, Battery, Ports.
2. Bulk Pricing rules (Products → edit → Pricing → Bulk pricing) show as a 'Buy more, save more' table, ideal for business buyers.
3. The Warranty field fills the Warranty tab. The Reviews tab only appears when the product has real customer reviews.
4. Variant options (rectangles, swatches, dropdowns, text, date and file) update price, SKU and stock live.

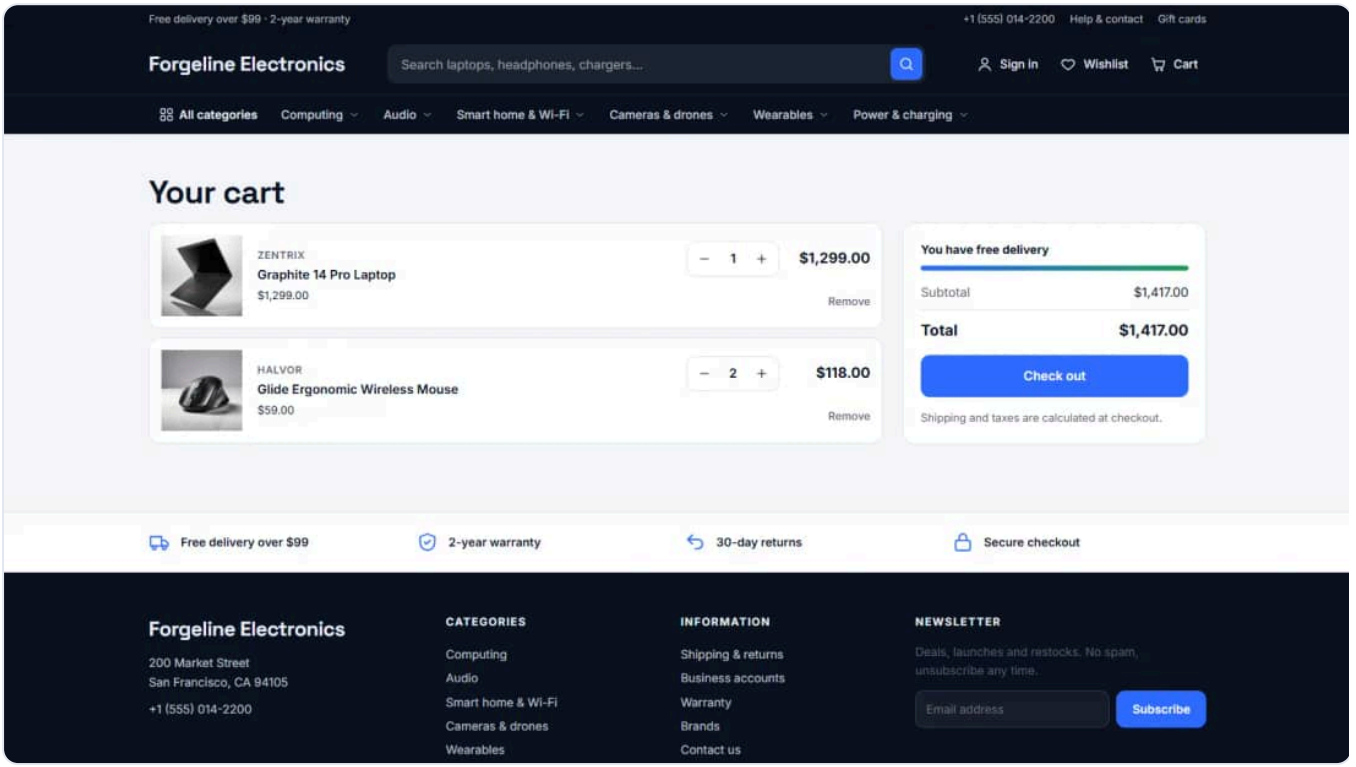

## 6 Filters, compare and search

1. Turn on Product Filtering (Settings → Search → Product Filtering) to show the filter sidebar on category, brand and search pages.
2. Shoppers can tick Compare on up to four products and open the comparison table.
3. The header search shows instant results as you type.

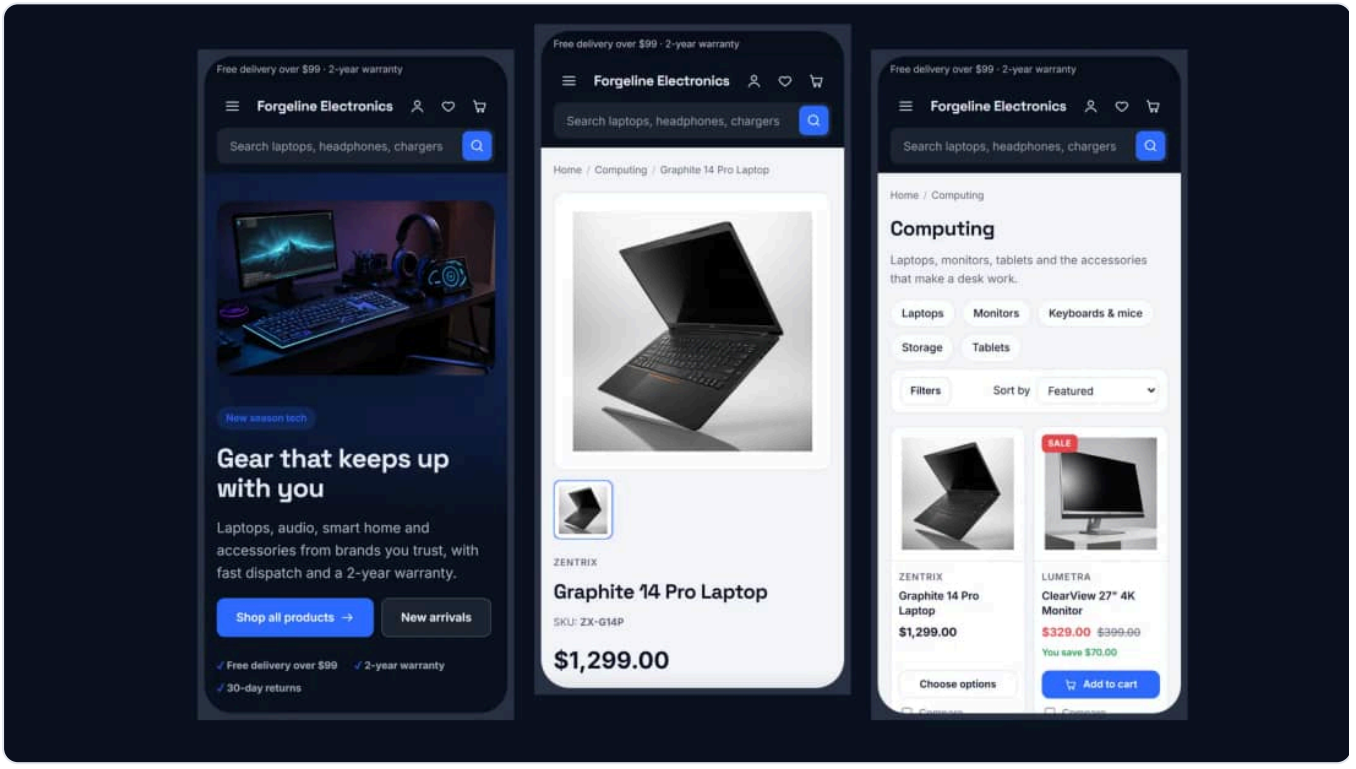

## 7 Cart and checkout

1. Add to cart works without leaving the page and shows a confirmation.
2. The cart shows a free-delivery meter; set the threshold under Products → Free shipping threshold (0 hides it).
3. Checkout is BigCommerce's own Optimized One-Page Checkout, styled to match.

## 8 Go live

1. Preview on mobile in the editor, then Publish.
2. Developers can also run the theme locally with the Stencil CLI (stencil start); no build step or webpack is needed.

## Questions

**Which BigCommerce plans does Forgeline work on?**

All plans. It is a standard Stencil theme and passes stencil bundle validation, including the marketplace checks.

**Does it need jQuery or a build step?**

No. One stylesheet compiled by BigCommerce and one plain JavaScript file.

**Can I use it on more than one store?**

One licence covers one live BigCommerce store plus its sandbox or staging store.

**Does it work with Multi-Storefront and currencies?**

Yes, it uses BigCommerce's own price objects, so currency switching and tax display follow your store settings.

**How do I get updates?**

Download the latest zip from your coodecraft.com account and upload it; BigCommerce keeps your saved theme settings per variation.

## Support

Email codecraftlko@gmail.com with your order number. Your licence includes a year of updates and support (or lifetime updates with the Lifetime plan).

The demo store's brand names and products are fictional samples. Product photos in the demo are not included in the theme.
