Installation and setup guide

Halden is a block theme for agencies, consultants and service businesses. Every page, the header and the footer are edited in the WordPress Site Editor with blocks, so you need no page builder.

In your download

- halden.zip — the theme you upload to WordPress
- Installation-Guide.pdf — this guide
- README.txt and LICENSE.txt

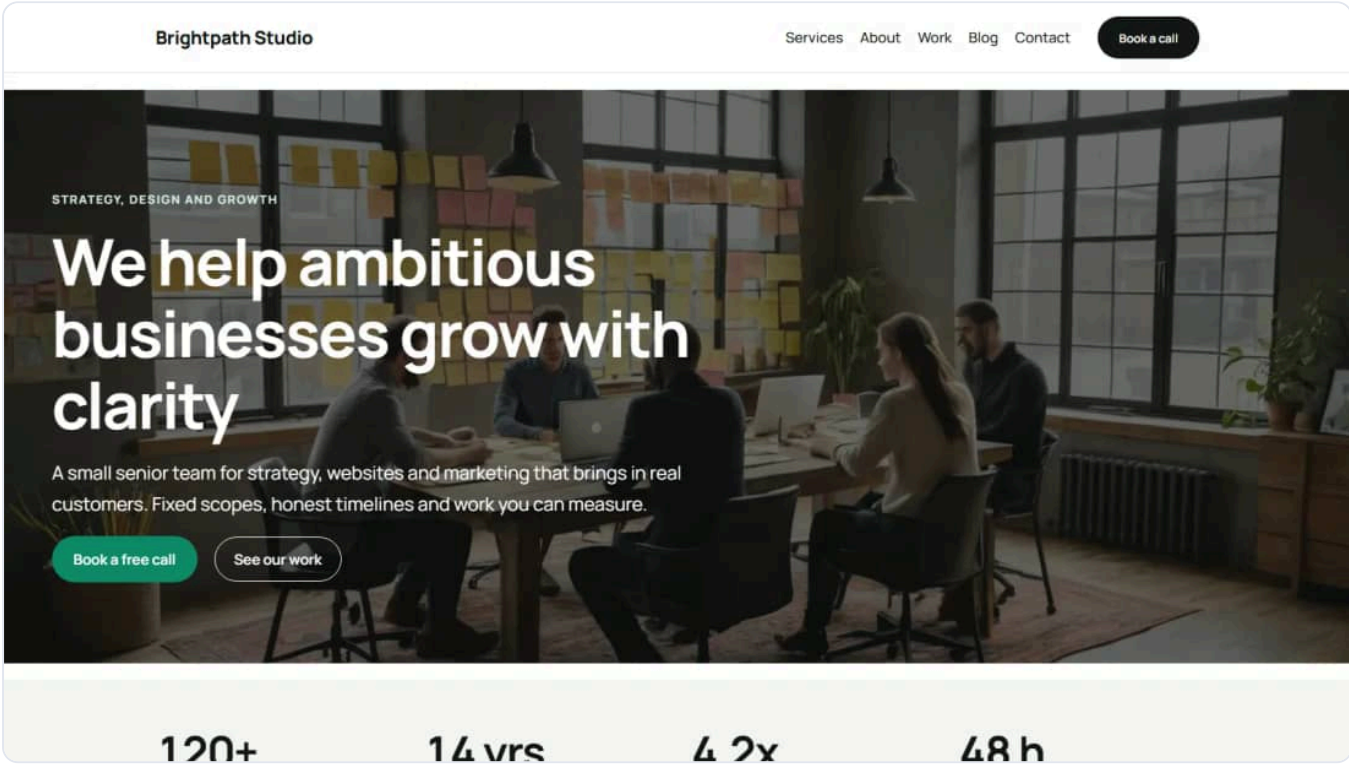

You will need

- WordPress 7.1 or newer and PHP 7.4 or newer
- Any theme-capable host (shared hosting is fine)
- About 20 minutes

Version 1.0.0 · October 2026 · Live demo: https://coodecraft.com/demos/halden-wordpress-theme/index.html

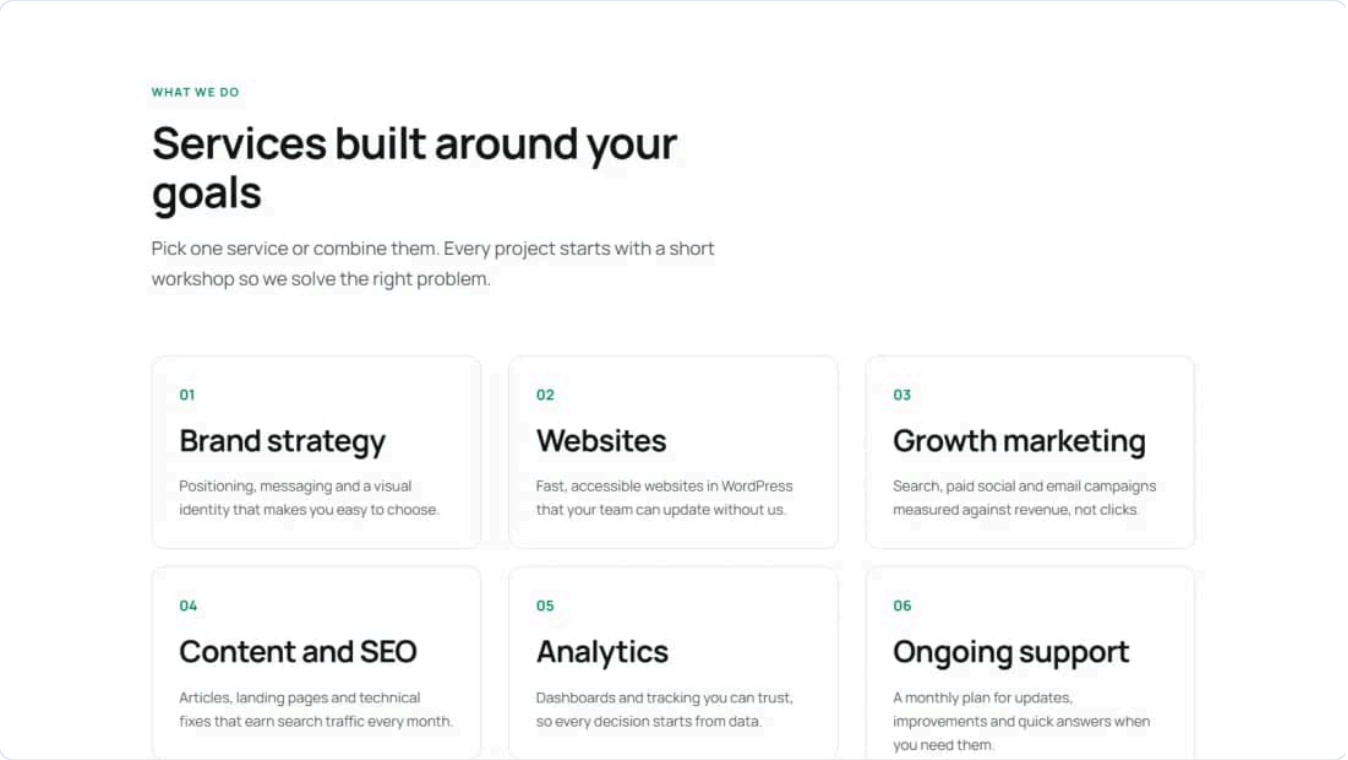

1 Upload and activate

1. In WordPress admin go to Appearance → Themes → Add New Theme → Upload Theme.
2. Choose halden.zip from your download (not the outer download zip) and click Install Now.
3. Click Activate. Your home page now shows Halden's ready-made home page layout.

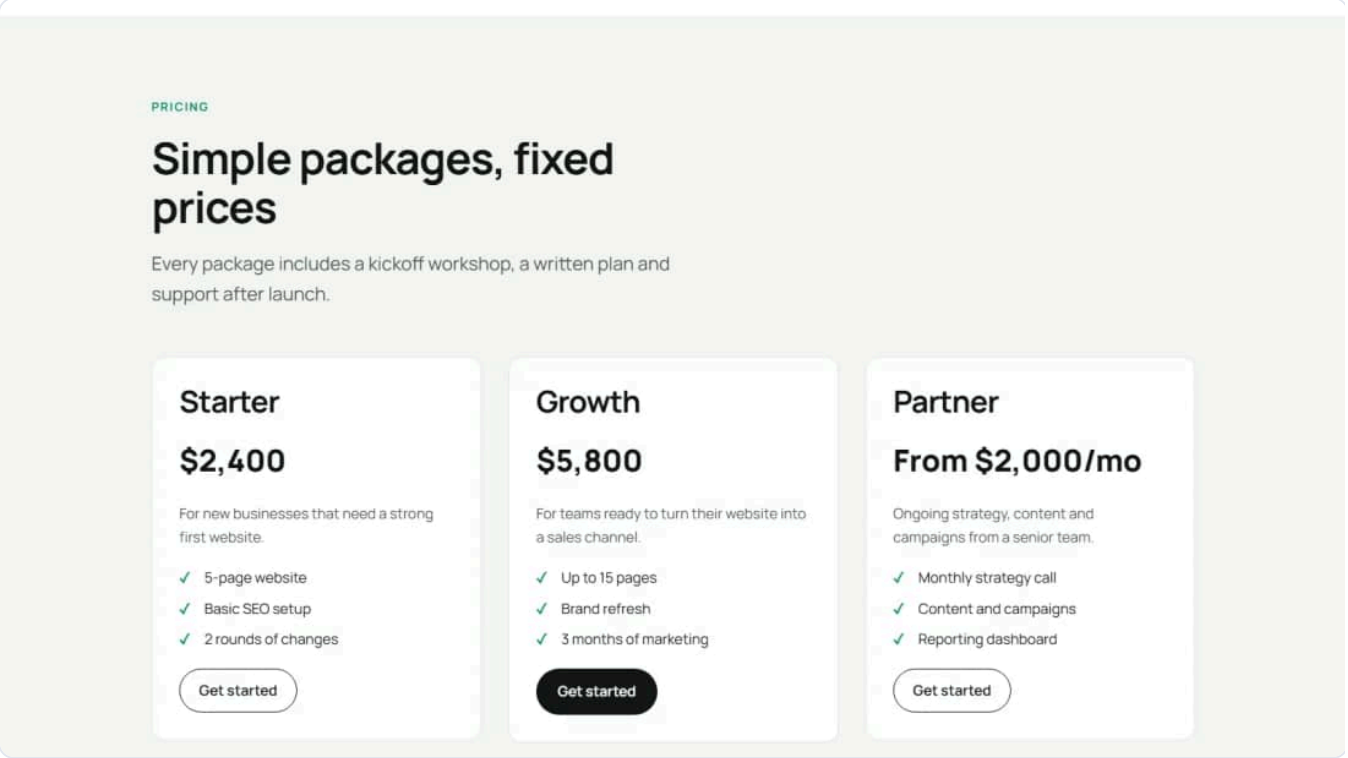

2 Make the home page yours

1. Open Appearance → Editor → Templates → Front Page (or Pages, then your home page).
2. Click any text to edit it, replace images from the block toolbar, and remove sections you don't need.
3. Add more sections with the + inserter: open Patterns and pick a Halden: Sections pattern.

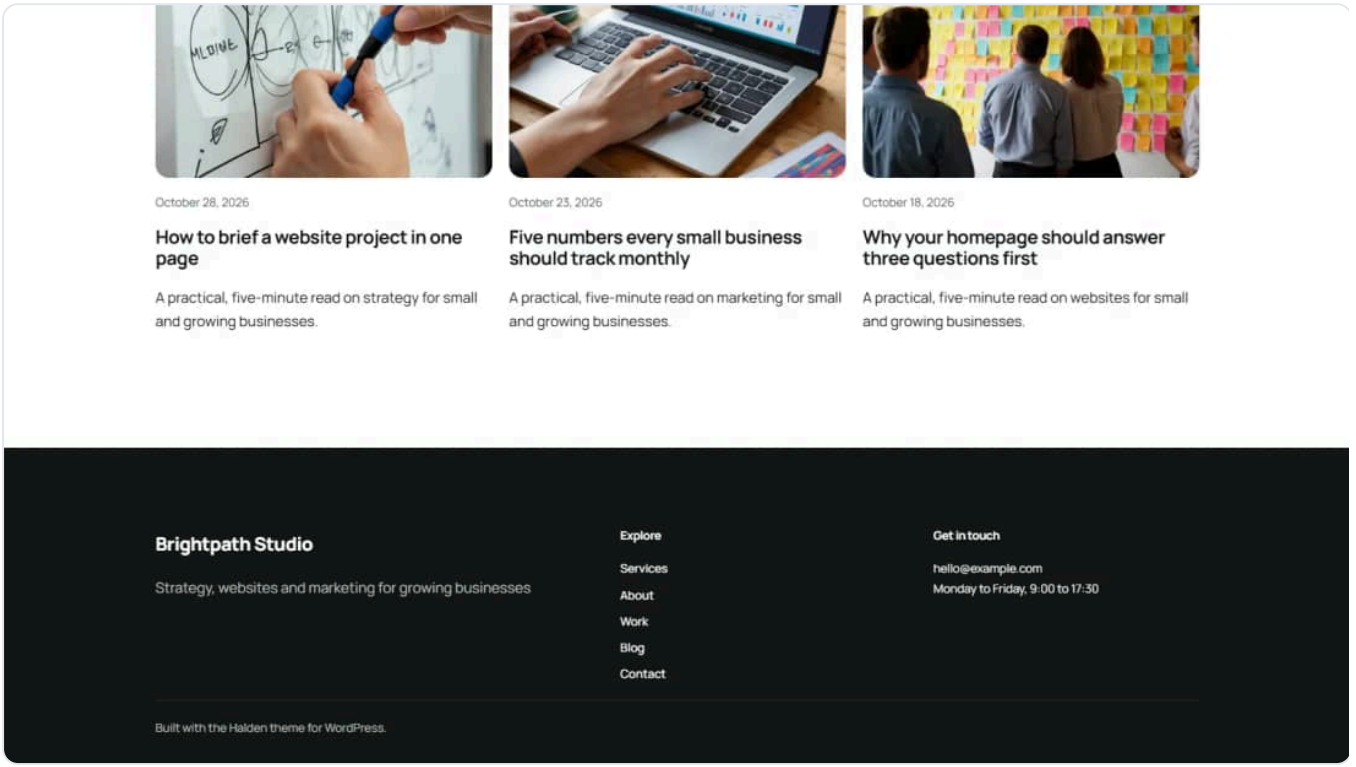

3 Build inner pages with patterns

1. Create a page (Pages → Add New Page) and choose the Page without title template in the page settings if you want a full-width layout.
2. Insert the Page header pattern first, then add Services, Image and text, Process, Projects, Pricing, FAQ, Contact details or Call to action.
3. Fourteen patterns are included under Halden: Sections and Halden: Pages.

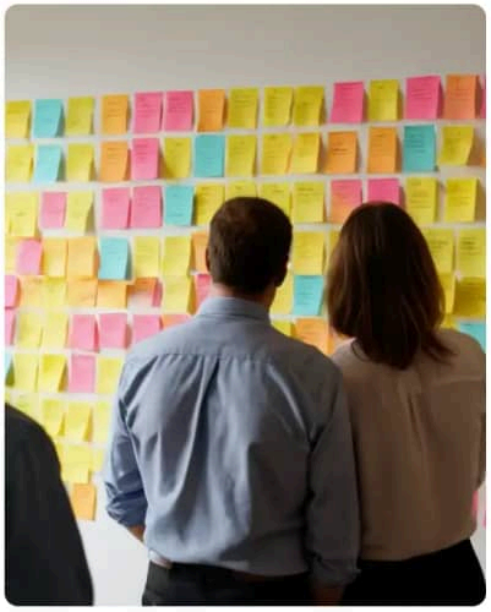

4 Menu, logo and footer

1. Appearance → Editor → Patterns → Template parts → Header: add your logo with the Site Logo block and edit the Navigation block's links.
2. The footer is a template part too: change the email, opening hours and the bottom line there.
3. The header button links to # by default; set it to your contact or booking page.

5 Colours and fonts

1. Appearance → Editor → Styles.
2. Pick one of the four style variations: Halden (green), Harbor (blue), Ember (orange) or Sand (warm neutral).
3. Change any colour, font size or spacing; the theme bundles the Manrope font locally, so no Google requests are made.

Questions

Does Halden need a page builder?

No. Everything is built with core WordPress blocks, patterns and the Site Editor.

Which WordPress version do I need?

WordPress 7.1 or newer. Halden was built and tested on WordPress 7.1 and uses its latest block markup.

Can I use it for any kind of business?

Yes. The demo is a consultancy, but the patterns suit agencies, studios, consultants, coaches, clinics and other service businesses.

Is there a contact form?

No. Block themes do not include forms. Add a form plugin and place its block in the Contact details pattern.

How do I get updates?

Download the latest zip from your coodecraft.com account and upload it; WordPress offers to replace the current version.
