PayPal Payments — Guide

Add-on for **Code Craft Store: Laravel Ecommerce**. Version 1.0.0.

PayPal checkout using the Orders v2 API. The customer approves on PayPal, the store captures the payment server-side and checks the captured amount before marking the order paid.

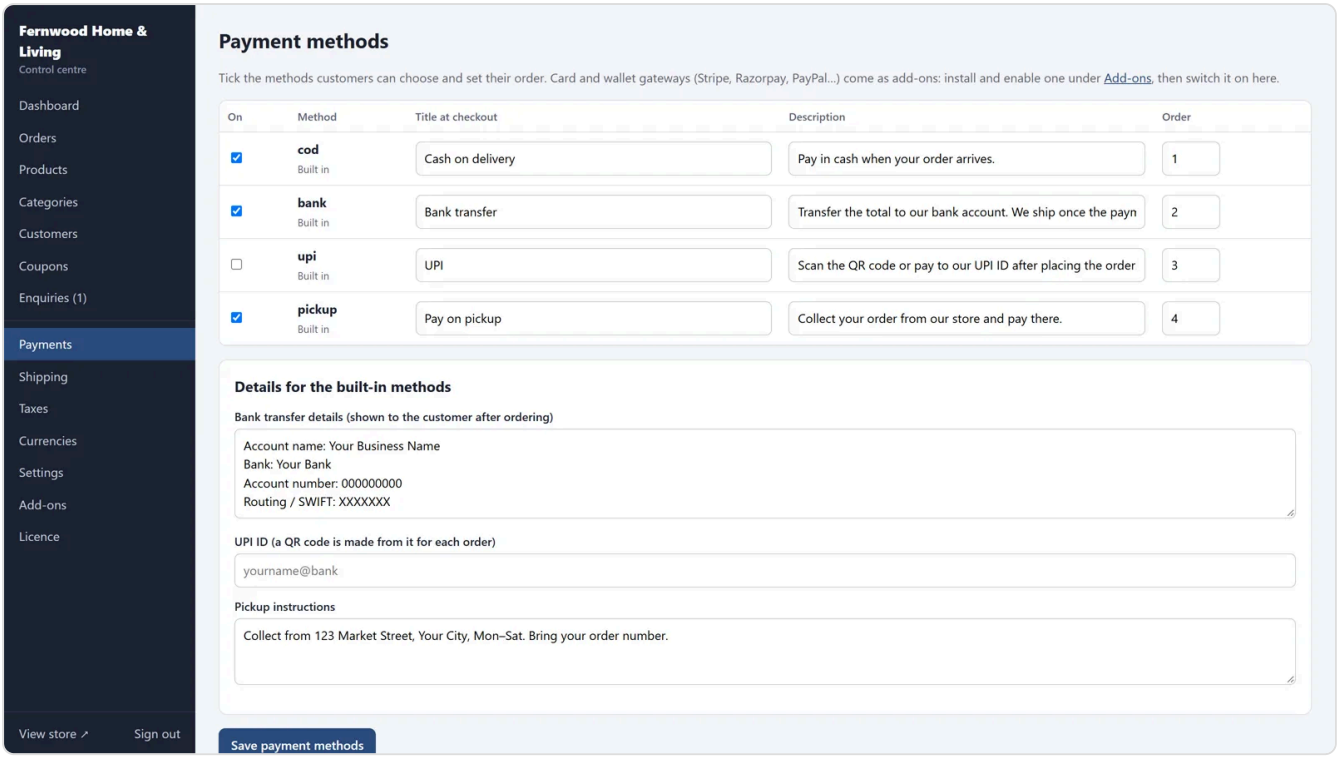

Install

1. Upload the `paypal` folder from the zip to your store as `addons/paypal/` (cPanel or Hostinger File Manager, or FTP).
2. Open **Admin → Add-ons**. The add-on appears with its settings card.
3. Fill in the settings below, paste the add-on's licence key from your purchase email, tick **Enable this add-on** and save.
4. Open **Admin → Payments**, tick the new method and set its title and order. It shows at checkout once its keys are saved.

Settings

Mode	Options: Sandbox (testing) · Live
Client ID	developer.paypal.com → Apps & Credentials. Use the Sandbox app while testing.
Secret	

Webhook ID (optional, recommended)	In your PayPal app add the webhook https://your-domain.com/webhooks/paypal with the event PAYMENT.CAPTURE.COMPLETED and copy its Webhook ID here. Each event is verified with PayPal's verify-webhook-signature API.
Name shown on PayPal	
Licence key	From your purchase email or coodecraft.com/account. Not needed on localhost.

Details

```
PayPal Payments 1.0.0 - add-on for the Code Craft Laravel Ecommerce Store
============================================================

PayPal checkout using the Orders v2 API. The customer approves on PayPal, the store captures the
payment server-side and checks the captured amount before marking the order paid.

Install
-------
1. Upload this folder to your store as addons/paypal/ (so addons/paypal/addon.json exists).
2. Open Admin -> Add-ons, fill in the settings and your licence key for this add-on, tick Enable,
Save.
3. Open Admin -> Payments and tick the new method to show it at checkout.

Setup: developer.paypal.com -> Apps & Credentials (Sandbox app while testing). Optional webhook:
https://YOUR-DOMAIN/webhooks/paypal with event PAYMENT.CAPTURE.COMPLETED; paste its Webhook ID.
Uses
Orders v2: create order -> customer approves -> the store captures server-side and checks the
captured amount. Webhooks are verified with PayPal verify-webhook-signature.
```

```
Testing: this add-on was tested with mocked HTTP responses only (no real keys, no real payments).
Use the provider's test/sandbox mode first and place a test order before going live.

Support: https://coodecraft.com/contact
```

> Always place a test payment in the provider's test or sandbox mode before switching to live keys. This add-on was tested with simulated (mocked) provider responses.
