Razorpay Payments — Guide

Add-on for **Code Craft Store: Laravel Ecommerce**. Version 1.0.0.

UPI, cards, netbanking and wallets through Razorpay Checkout. Uses Razorpay Orders; every payment signature is verified with your key secret before the order is marked paid.

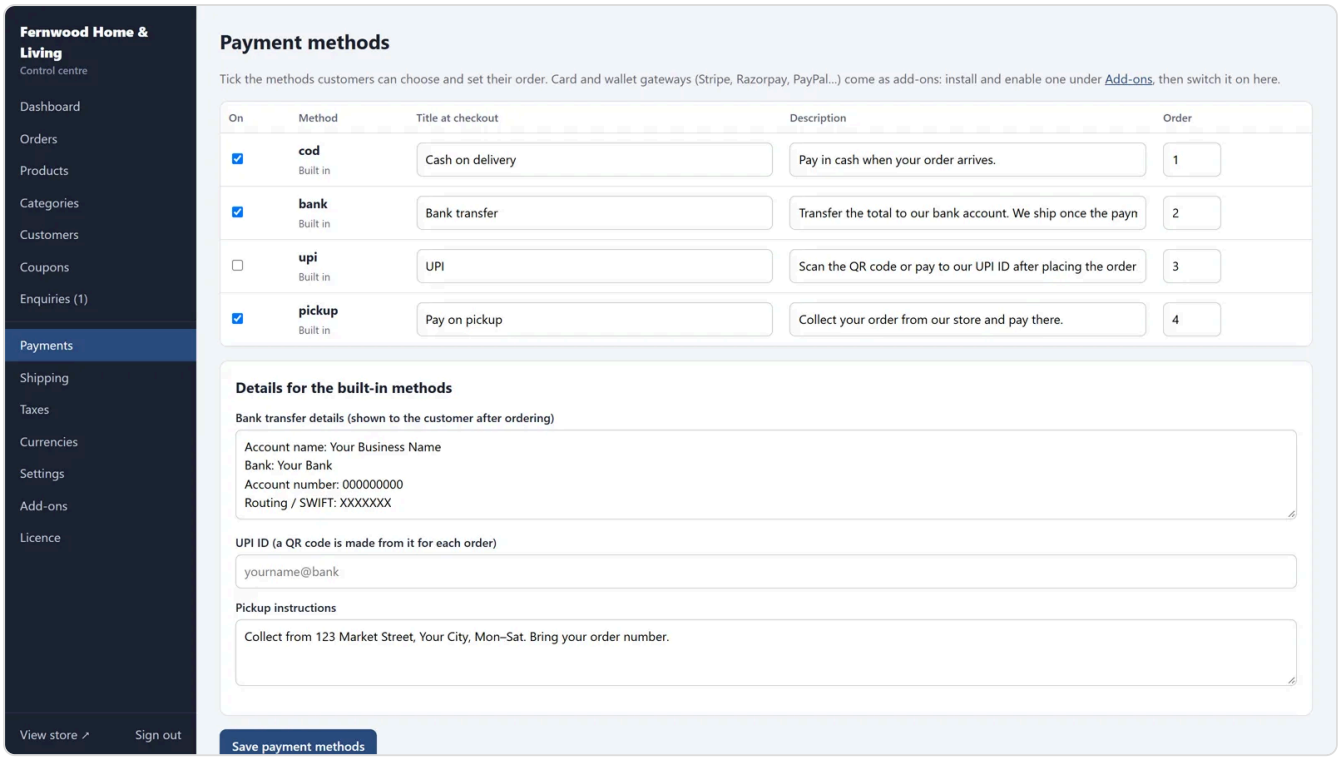

Install

1. Upload the `razorpay` folder from the zip to your store as `addons/razorpay/` (cPanel or Hostinger File Manager, or FTP).
2. Open **Admin → Add-ons**. The add-on appears with its settings card.
3. Fill in the settings below, paste the add-on's licence key from your purchase email, tick **Enable this add-on** and save.
4. Open **Admin → Payments**, tick the new method and set its title and order. It shows at checkout once its keys are saved.

Settings

Key ID	Razorpay Dashboard → Account & Settings → API keys. Starts with rzp_test_ or rzp_live_.
Key secret	
Webhook secret (optional, recommended)	Razorpay Dashboard → Webhooks → add https://your-domain.com/webhooks/razorpay with the events payment.captured and

	order.paid, choose a secret and enter the same secret here.
Checkout colour	
Licence key	From your purchase email or coodecraft.com/account. Not needed on localhost.

Details

```
Razorpay Payments 1.0.0 - add-on for the Code Craft Laravel Ecommerce Store
============================================================

UPI, cards, netbanking and wallets through Razorpay Checkout. Uses Razorpay Orders; every payment
signature is verified with your key secret before the order is marked paid.

Install
-------
1. Upload this folder to your store as addons/razorpay/ (so addons/razorpay/addon.json exists).
2. Open Admin -> Add-ons, fill in the settings and your licence key for this add-on, tick Enable,
Save.
3. Open Admin -> Payments and tick the new method to show it at checkout.

Setup: Razorpay Dashboard -> Account & Settings -> API keys (rzp_test_ while testing). Optional
webhook: https://YOUR-DOMAIN/webhooks/razorpay with events payment.captured and order.paid and a
secret of your choice. Uses the Orders API; the checkout signature HMAC-
SHA256(order_id|payment_id,
key_secret) is verified before the order is marked paid.

Testing: this add-on was tested with mocked HTTP responses only (no real keys, no real payments).
Use the provider's test/sandbox mode first and place a test order before going live.
```

```
Support: https://coodecraft.com/contact
```

> Always place a test payment in the provider's test or sandbox mode before switching to live keys. This add-on was tested with simulated (mocked) provider responses.
