Marigold — Shopify Theme

Installation and setup guide

Marigold is an Online Store 2.0 Shopify theme for fashion, beauty and lifestyle brands. Every page is built from sections you can add, remove and reorder in the Shopify theme editor, with no code.

In your download

- Marigold-1.0.0.zip — the theme you upload to Shopify
- Installation-Guide.pdf — this guide
- README.txt and LICENSE.txt

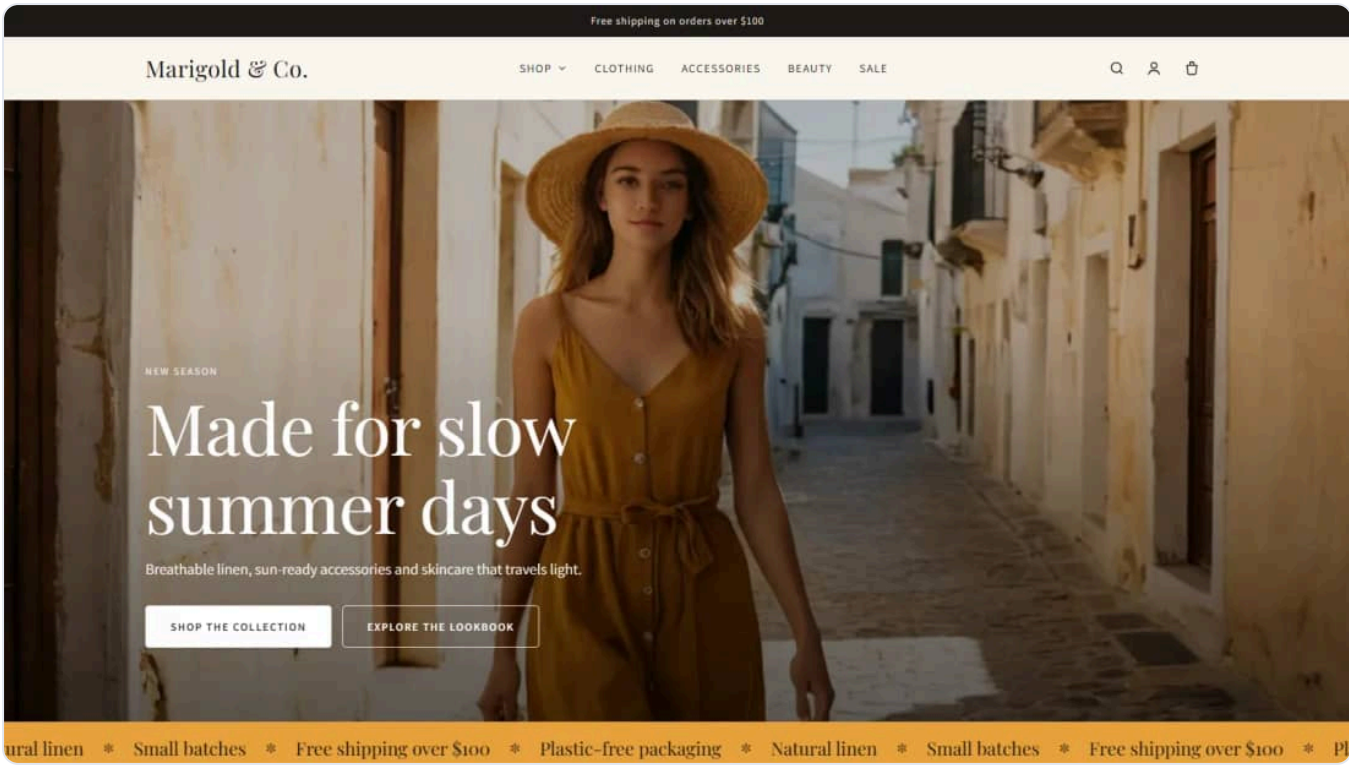

You will need

- A Shopify store on any plan (Basic or higher)
- Products, collections and a main menu (the theme works with your existing ones)
- About 20 minutes

Version 1.0.0 · October 2026 · Live demo: https://coodecraft.com/demos/marigold-shopify-theme/index.html

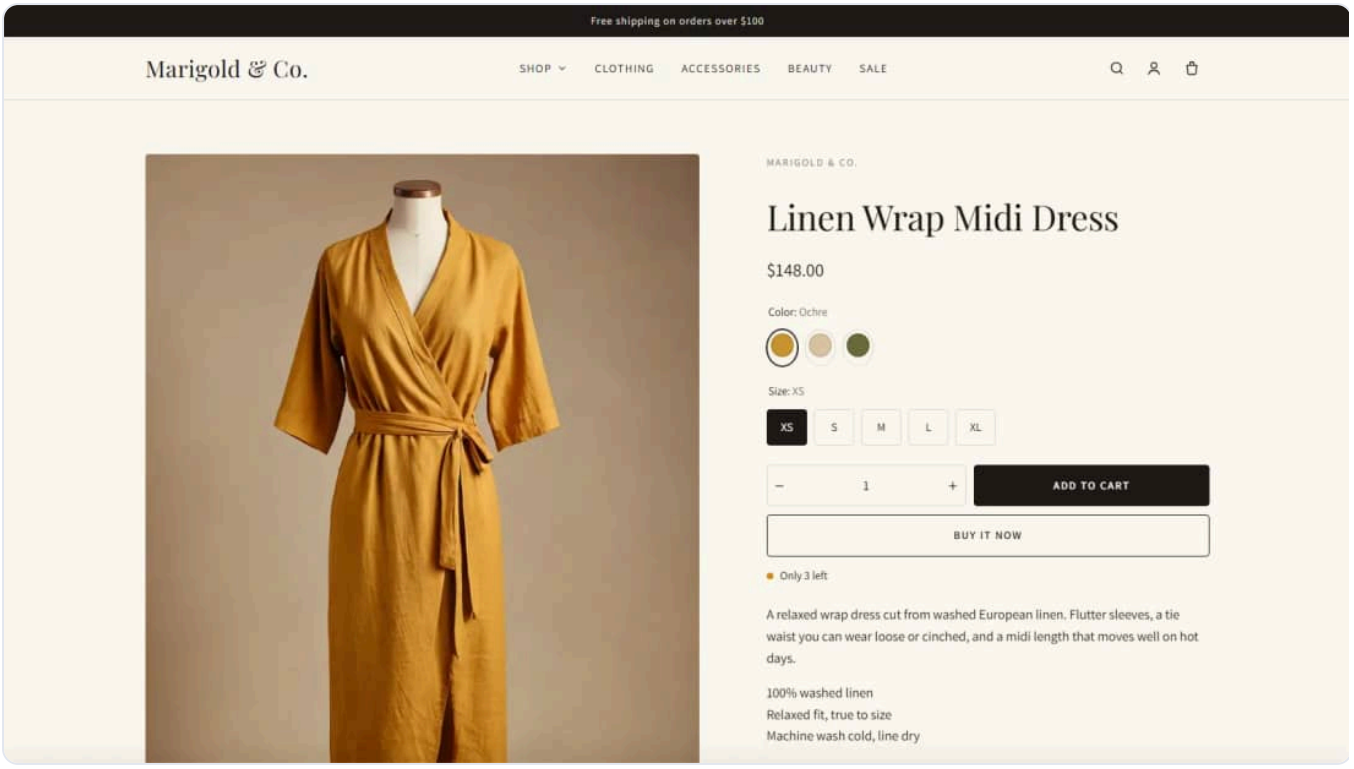

1 Upload the theme

1. In Shopify admin open Online Store → Themes.
2. Under Theme library click Add theme → Upload zip file.
3. Choose Marigold-1.0.0.zip from your download (not the outer download zip) and wait for the upload to finish.
4. Marigold appears in your theme library. Click Customize to set it up before publishing.

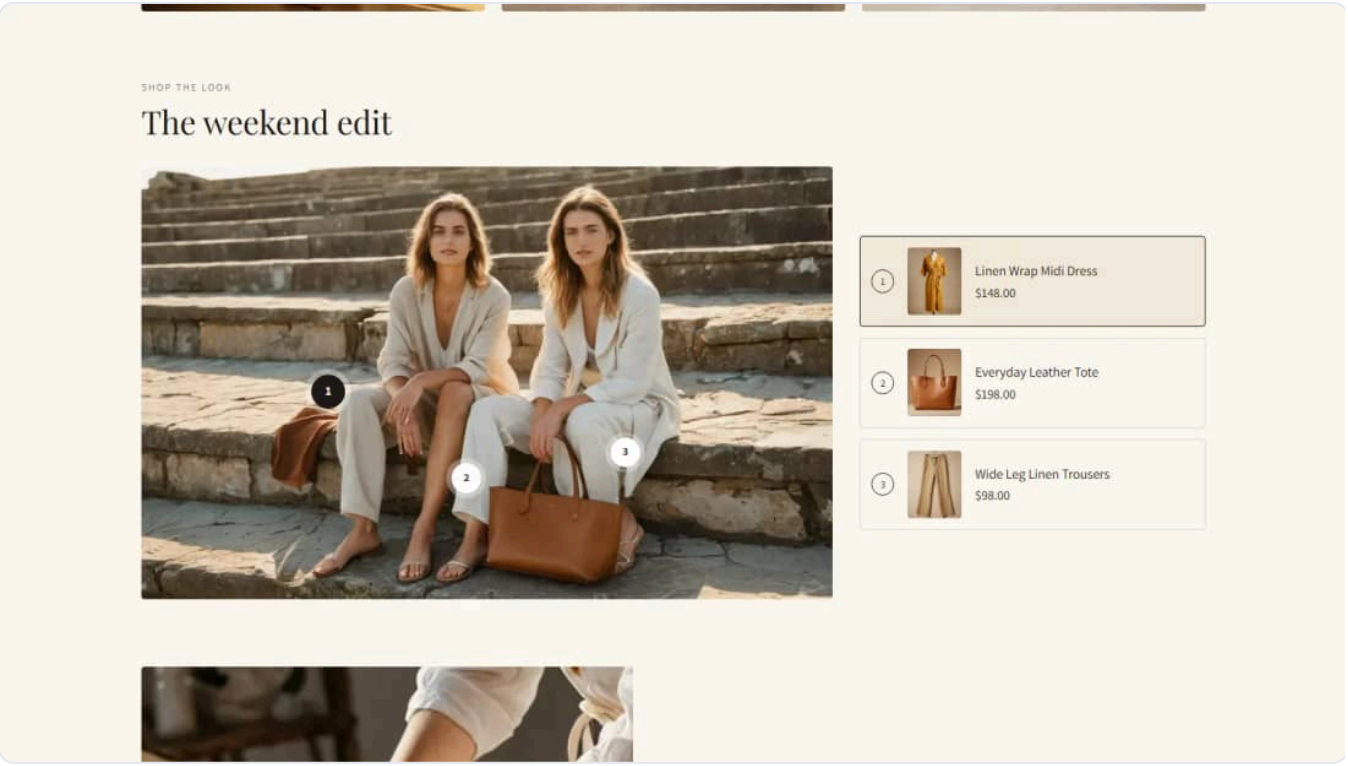

2 Pick a style and your brand

1. In the editor open Theme settings (paint-brush icon).
2. Colours: background, text, buttons and sale badge. Three presets ship with the theme: Marigold (warm), Sage (green) and Noir (black and white).
3. Typography: choose heading and body fonts from Shopify's font library.
4. Header section: upload your logo and set its width.

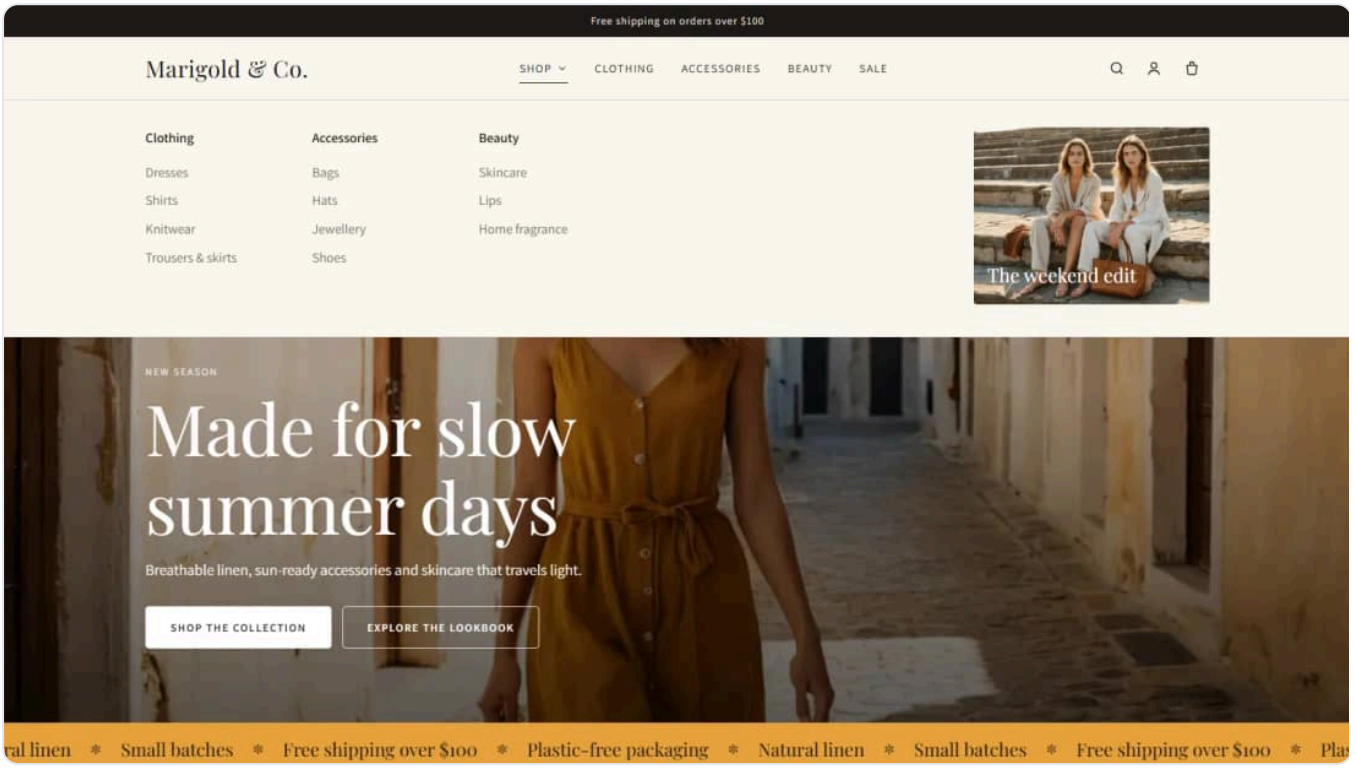

3 Build the homepage

1. Hero banner: upload an image (2400 px wide works best), write your heading and link the buttons.
2. Featured collection: pick the collection to show, e.g. New arrivals.
3. Collection list: pick up to 8 collections; each tile uses the collection image unless you upload one.
4. Shoppable lookbook: upload a lifestyle photo, then add a hotspot per product and drag its horizontal and vertical position.
5. Add, hide or reorder any section with Add section.

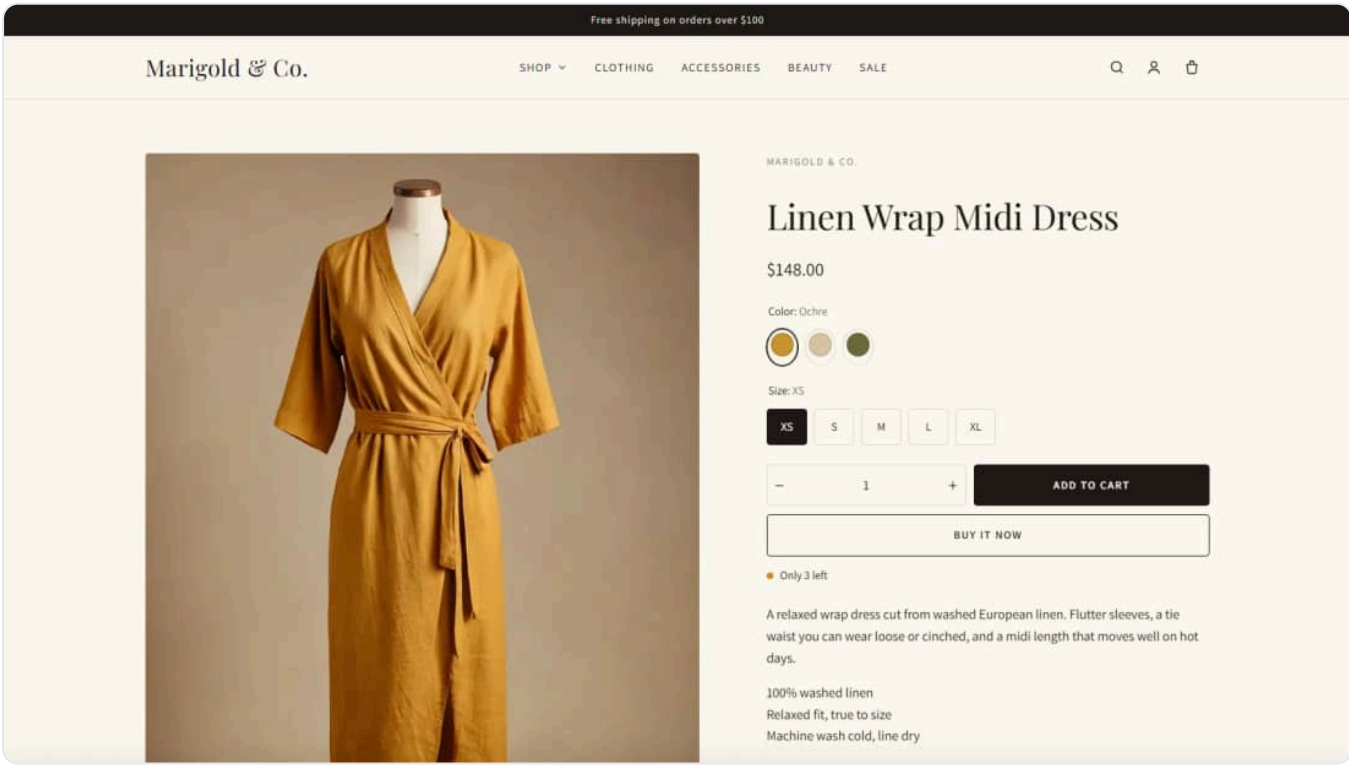

4 Menus and the mega menu

1. Go to Online Store → Navigation → Main menu.
2. Nest menu items to make dropdowns. A top item with two levels under it opens as a full-width mega menu.
3. In the Header section you can add a promo image and caption to the mega menu.

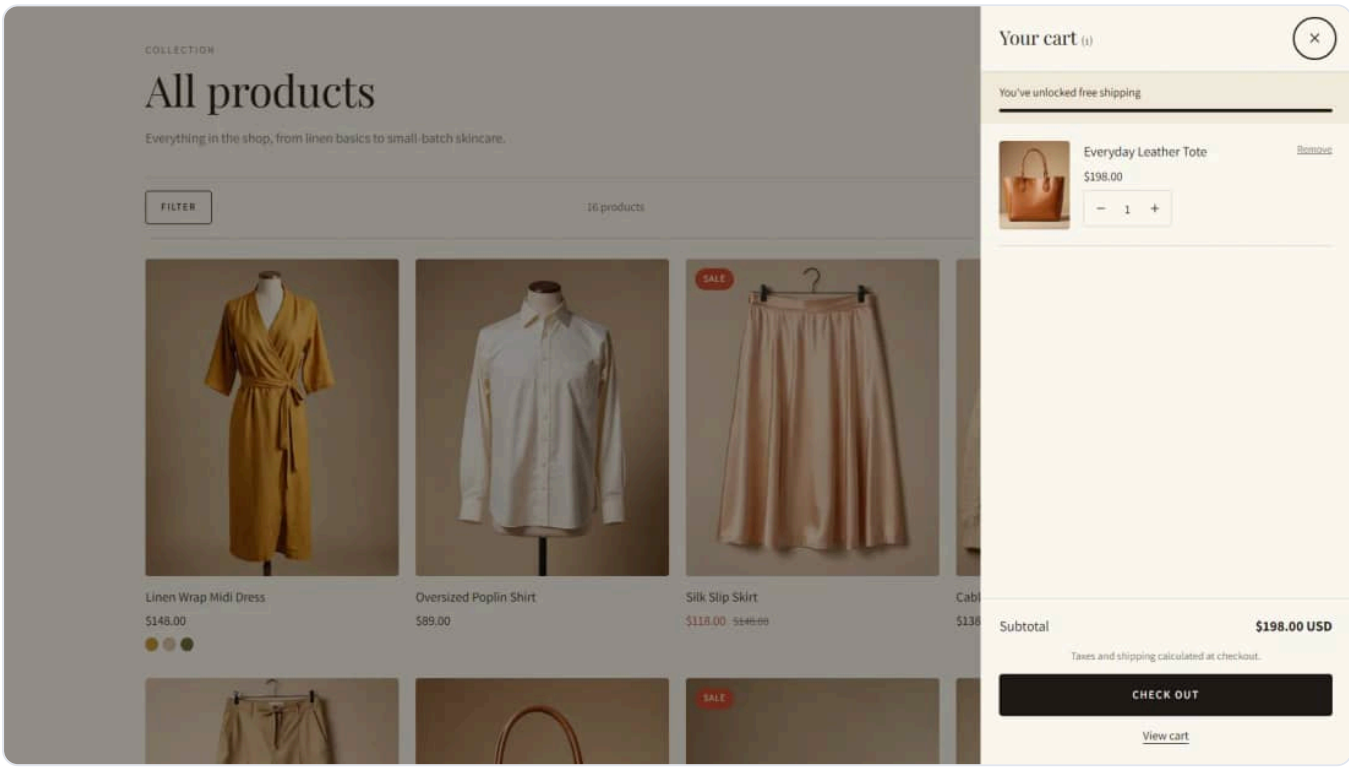

5 Product pages, swatches and size chart

1. Name an option Color (or Colour) and it shows as round swatches. Values linked to Shopify's colour swatches (category metafields) use those colours; otherwise a value that is a web colour name (Black, Navy, Olive, Tan) is drawn in that colour and other names show as an outlined circle with the name on hover.
2. Create a page called Size guide in Online Store → Pages, then pick it in the product template's Variant picker block.
3. Collapsible tabs (Materials and care, Shipping and returns) can hold text or show a page.
4. Sticky add-to-cart bar, stock status and low-stock threshold are in the Product information section.

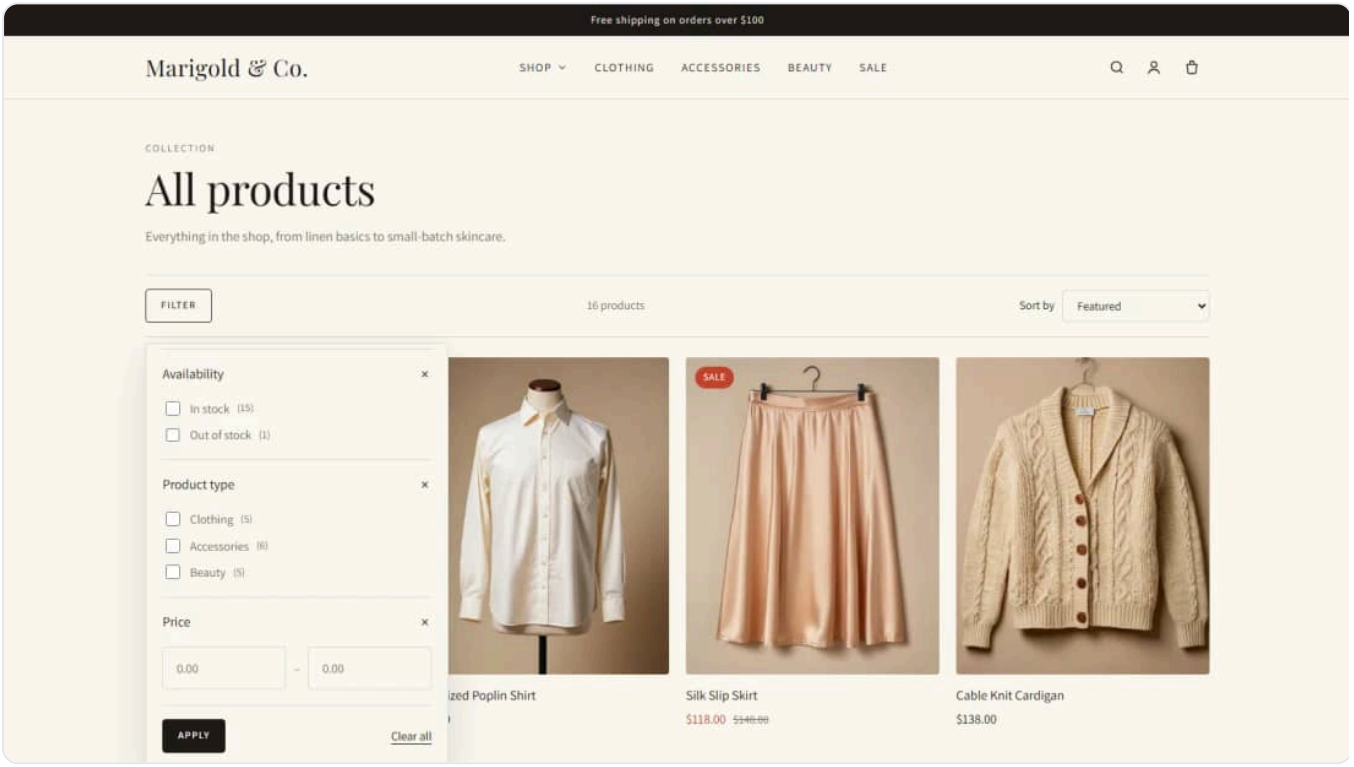

6 Cart drawer and free-shipping bar

1. Theme settings → Cart: choose Drawer (slides in after add to cart) or Page.
2. Set the Free shipping threshold in your store currency to show the progress bar; set 0 to hide it.
3. Quick add on product cards adds single-variant products straight to the cart.

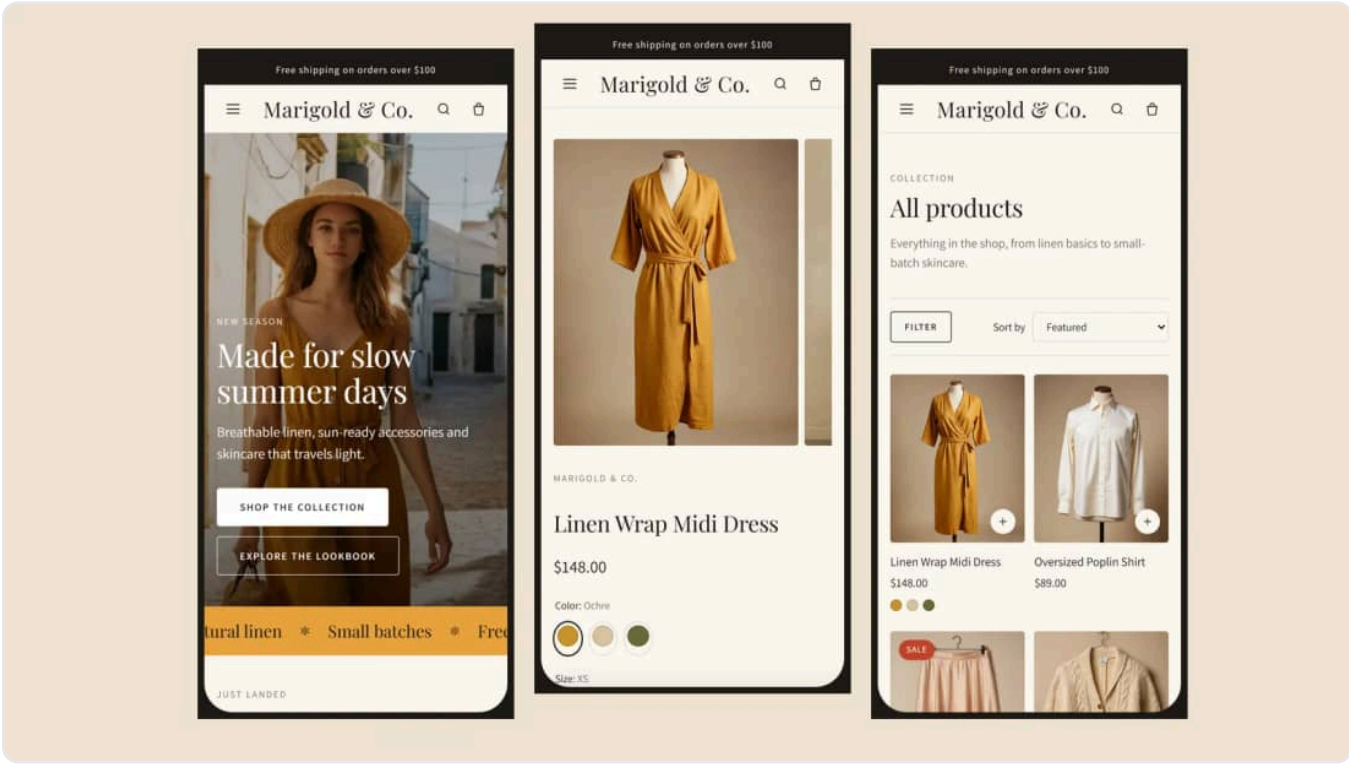

7 Filters and search

1. Collection filters use Shopify's Search & Discovery app (free). Add filters for availability, price, product type, vendor or colour there.
2. Predictive search in the header works automatically.

8 Publish

1. Preview on mobile with the device toggle at the top of the editor.
2. Click Save, then go back to Online Store → Themes and choose Publish on Marigold.

Questions

Which Shopify plans does Marigold work on?

All of them. It is a standard Online Store 2.0 theme with JSON templates and section groups.

Does it slow my store down?

No framework or jQuery: one CSS file and one small JavaScript file, lazy-loaded images with responsive sizes.

Will my apps work?

Yes. The product page accepts app blocks, and apps that add sections work with Add section.

Can I use it on more than one store?

One licence covers one live Shopify store plus its development or staging copies.

How do I get updates?

Download the latest zip from your coodecraft.com account and upload it as a new theme; copy your settings across with the editor.

Support

Email codecraftlko@gmail.com with your order number. Your licence includes a year of updates and support (or lifetime updates with the Lifetime plan).

The demo store's brand names and products are fictional samples. Product photos in the demo are not included in the theme.
