Vitrina — WooCommerce Theme

Installation and setup guide, version 1.1

Vitrina is a WooCommerce theme with a ready-made storefront. This guide takes you from the download to a finished store: install, import a starter site, arrange the homepage and set up the shop features.

In your download

- vitrina — the theme
- vitrina-child — a child theme for your own code
- vitrina-toolkit — the plugin for Quick View, wishlist, compare and starter sites
- Installation-Guide.pdf, README.txt and LICENSE.txt

You will need

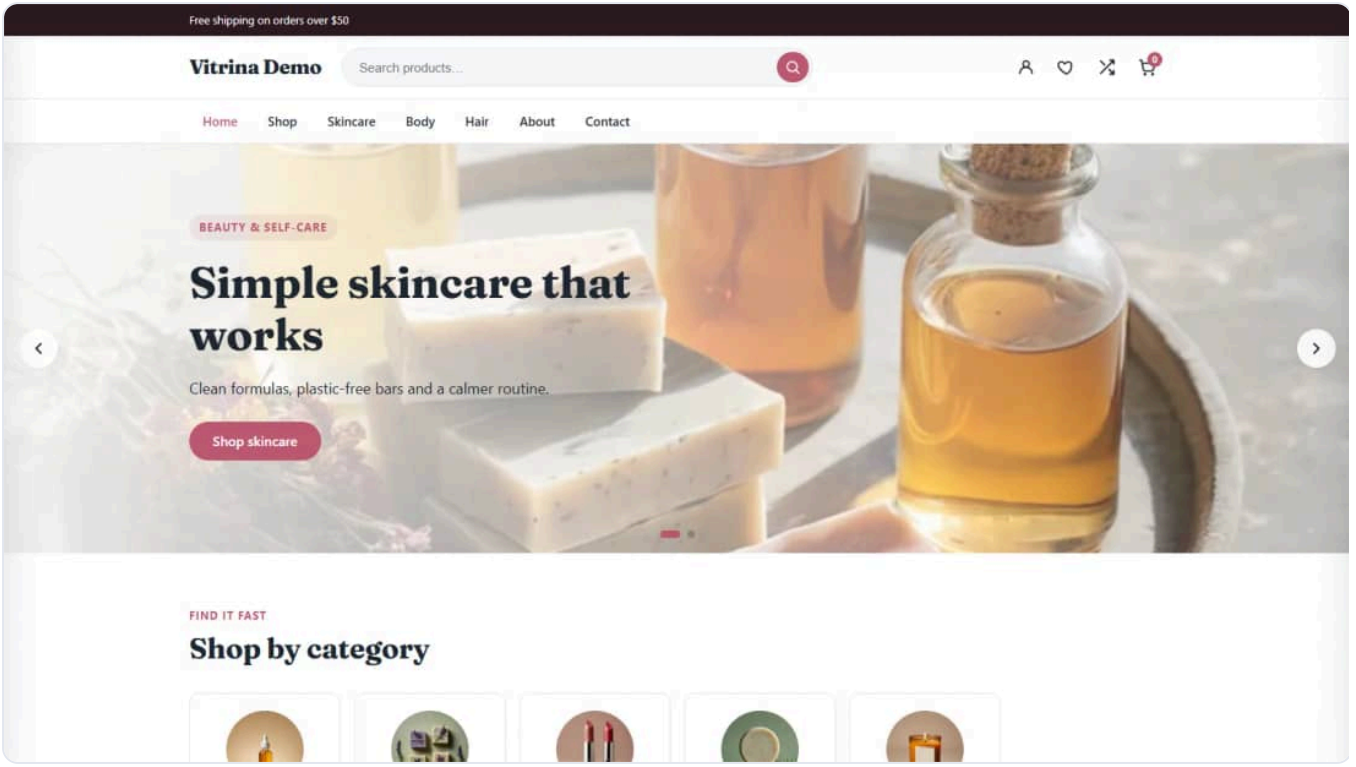

- WordPress 6.5 or newer (tested on 7.1) and PHP 7.4 or newer
- WooCommerce 8.0 or newer (tested on 11.2)
- About 20 minutes

Version 1.1.0 · November 2026

The starter-site store names and products are fictional samples. The starter-site photos are included in the Vitrina Toolkit and you may use them in your store.

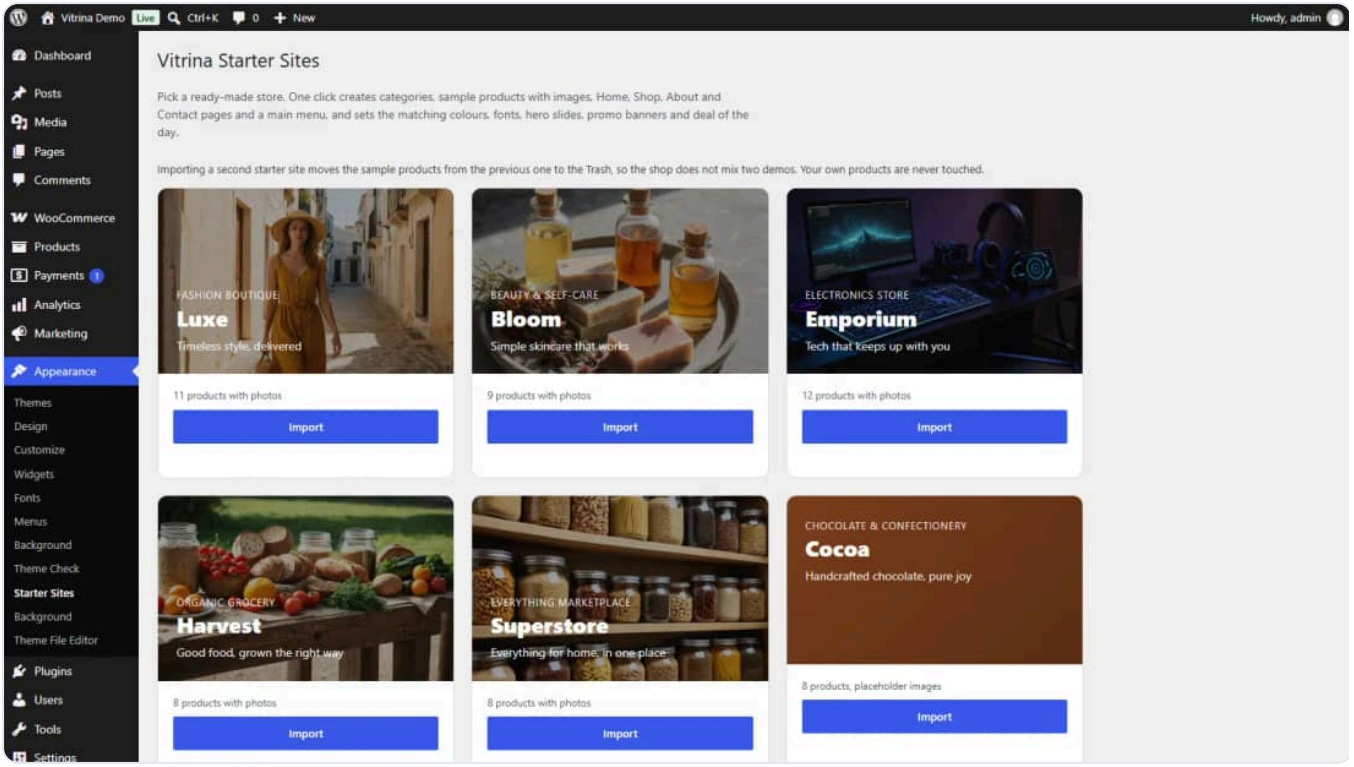

1 Upload the theme and the Toolkit

1. Zip the vitrina folder and upload it in Appearance → Themes → Add New Theme → Upload Theme, or copy it to wp-content/themes.
2. Zip the vitrina-toolkit folder and upload it in Plugins → Add New Plugin → Upload Plugin, or copy it to wp-content/plugins.
3. Activate Vitrina, then the Vitrina Toolkit. Activating the Toolkit creates the Wishlist and Compare pages.

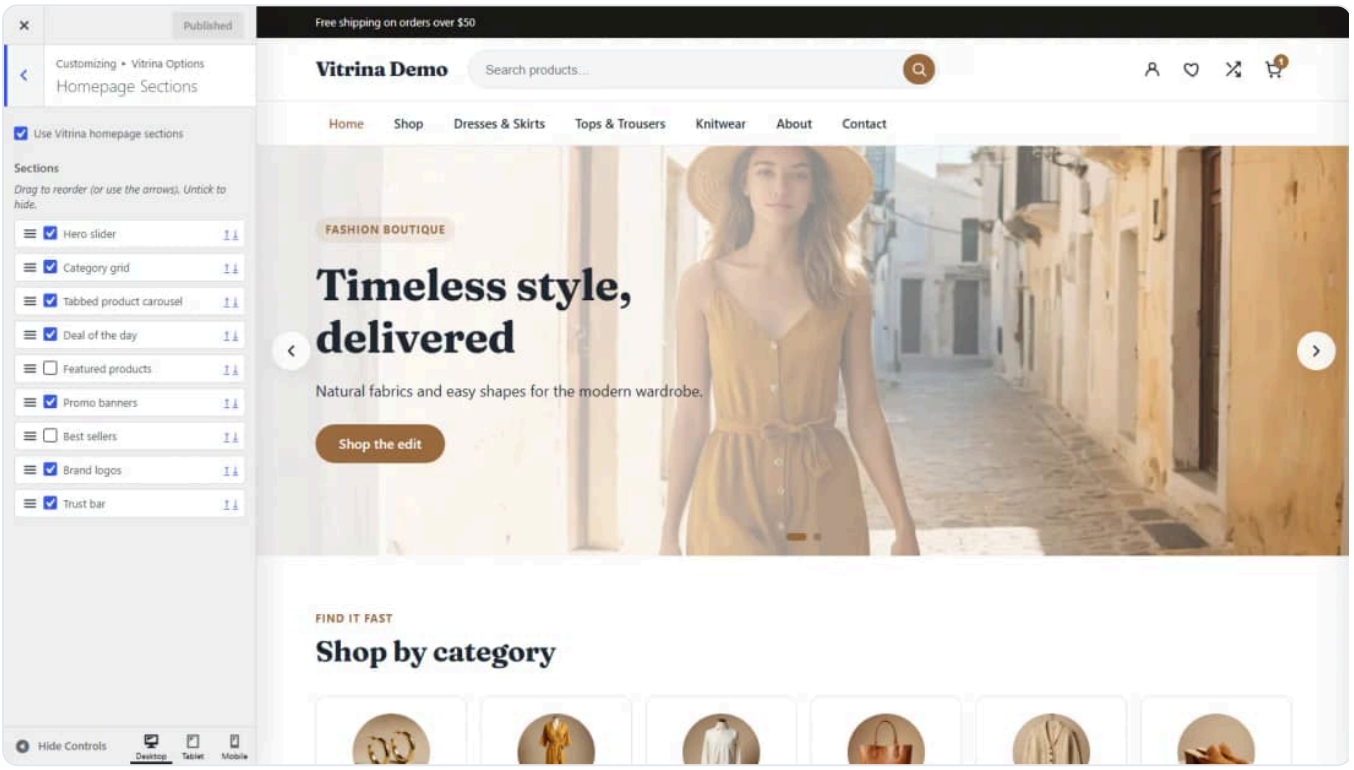

2 Import a starter site

1. Go to Appearance → Starter Sites.
2. Pick one of the ten stores and click Import. Luxe, Bloom, Emporium, Harvest and Superstore come with real product photos.
3. Importing creates categories, products, pages, the menu and the homepage content. Importing another starter site later moves the previous sample products to the Trash.

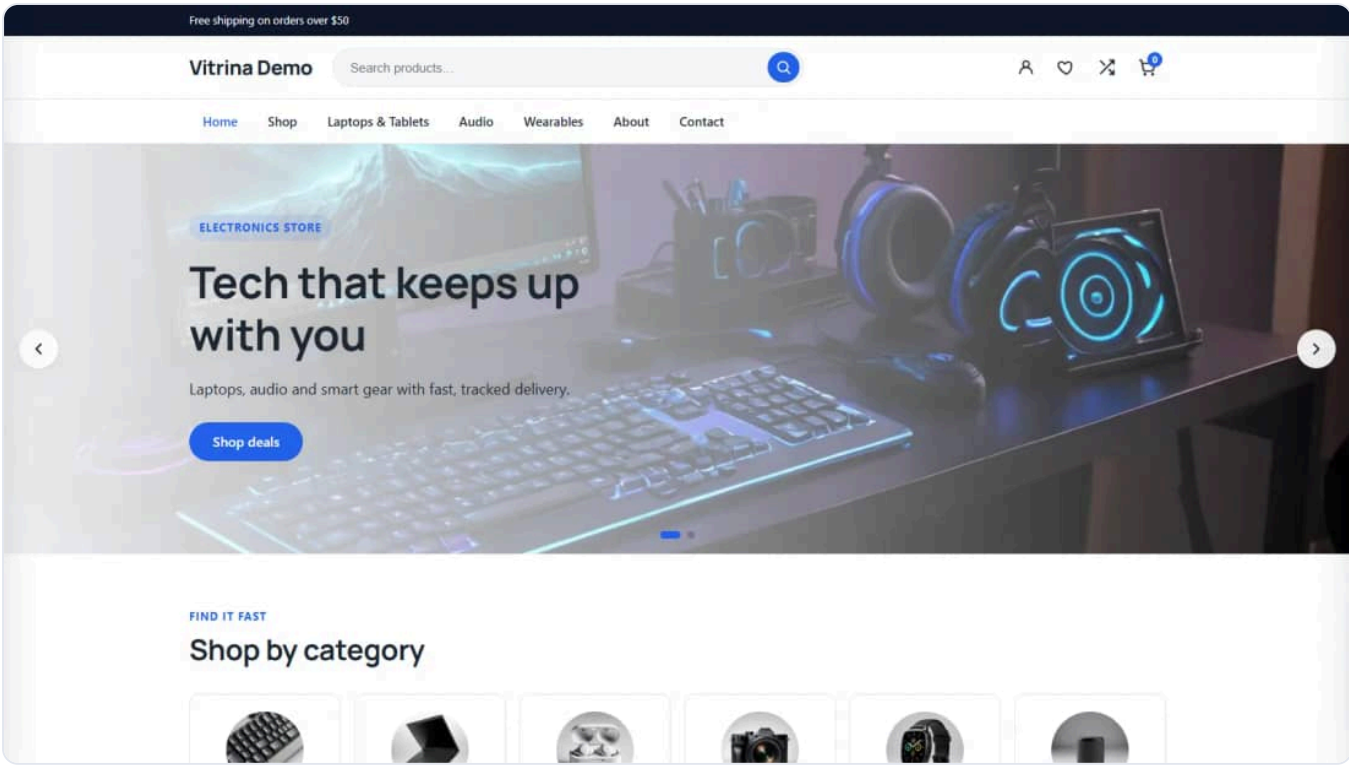

3 Arrange the homepage

1. Appearance → Customize → Vitrina Options → Homepage Sections.
2. Drag the nine sections into the order you want, or use the arrow buttons, and untick the ones to hide.
3. Edit the hero slides, promo banners, deal of the day, brand logos and trust bar in their own sections.

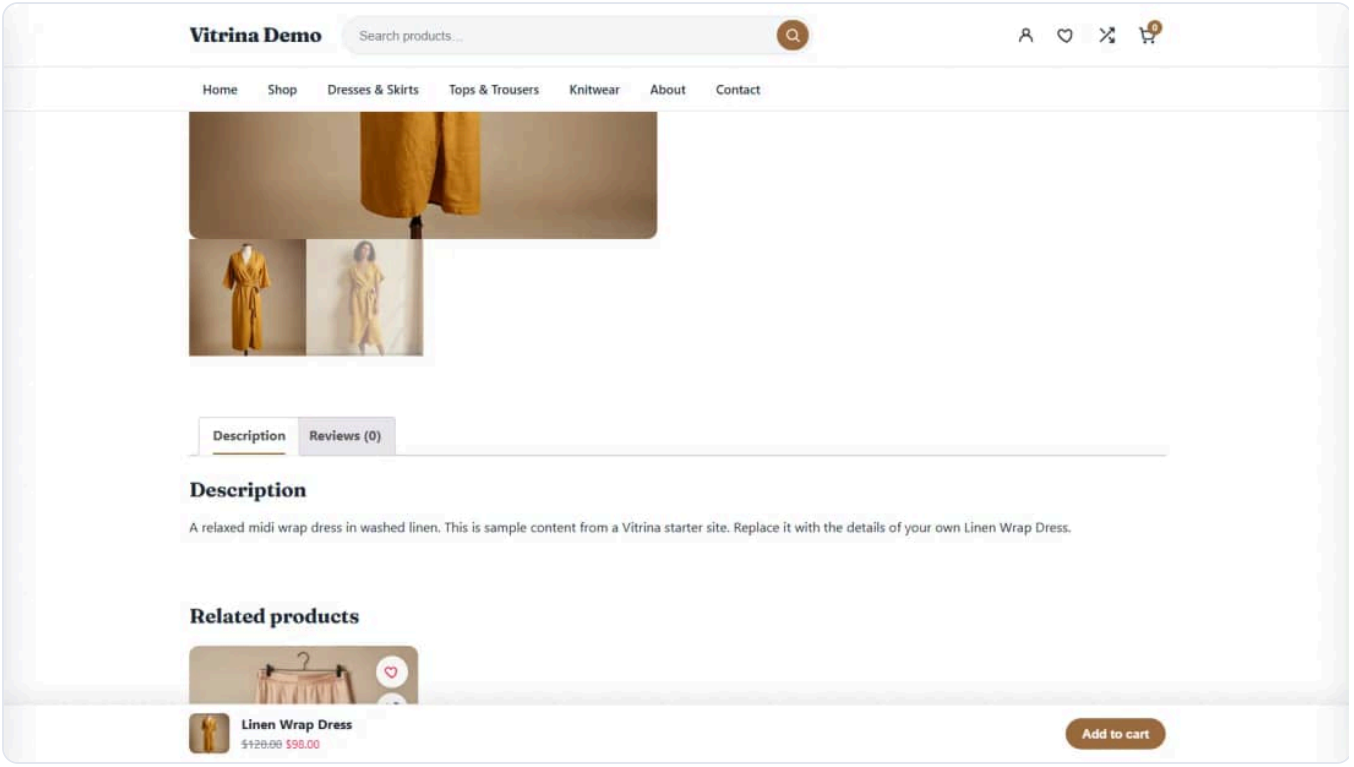

4 Header, menu and colours

1. Vitrina Options → Header: choose Classic, Centered or Inline and switch the top bar or sticky header on or off.
2. For a mega menu: Appearance → Menus → Screen Options → CSS Classes, then add vt-mega to a top-level item with sub-items.
3. Colours and Typography: set your accent and sale colours and fonts. Manrope and Fraunces are served from your own site.

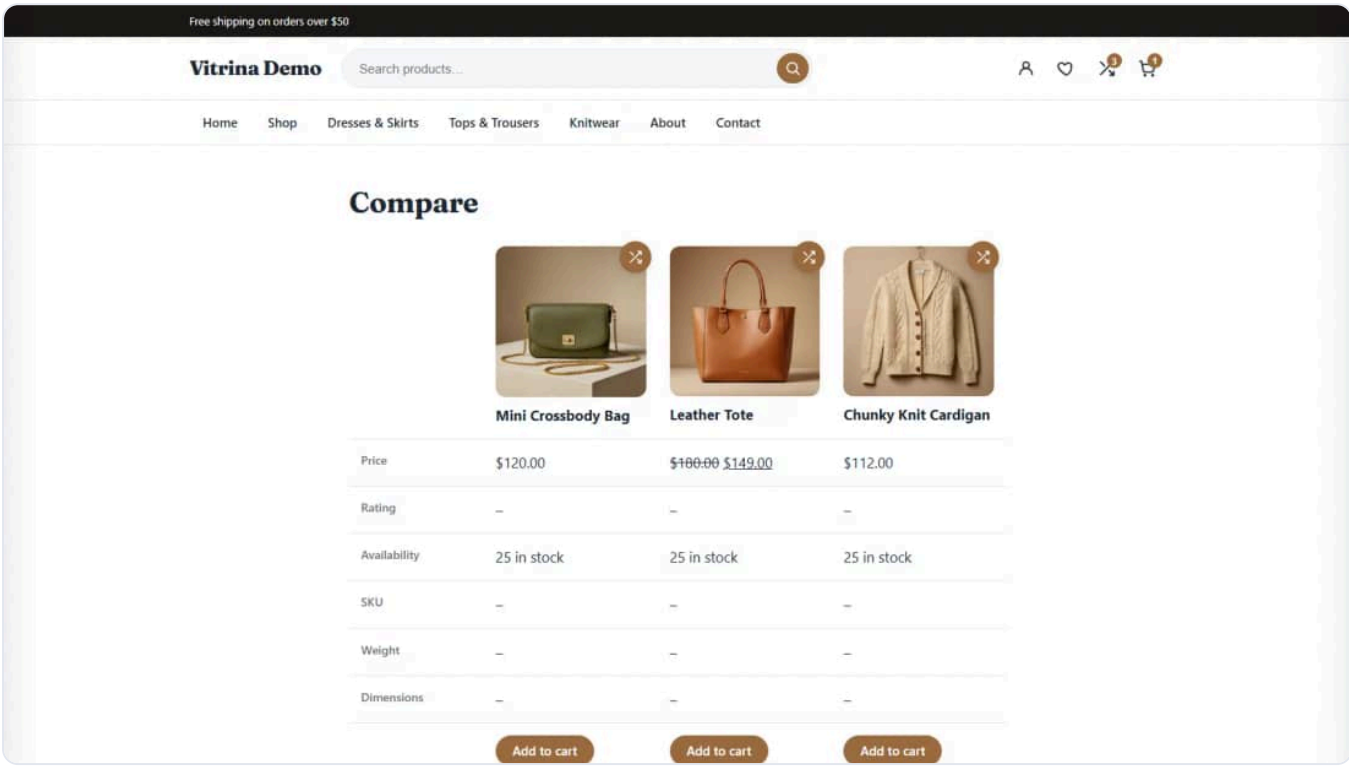

5 Shop features

1. Vitrina Options → Shop: products per row, products per page, image hover, Quick View and the sticky add-to-cart bar.
2. Set a free-shipping goal to show the progress meter in the cart; create the matching free-shipping rule in WooCommerce → Settings → Shipping.
3. Widgets: the starter sites put product search, categories and a price filter in the Shop Sidebar.

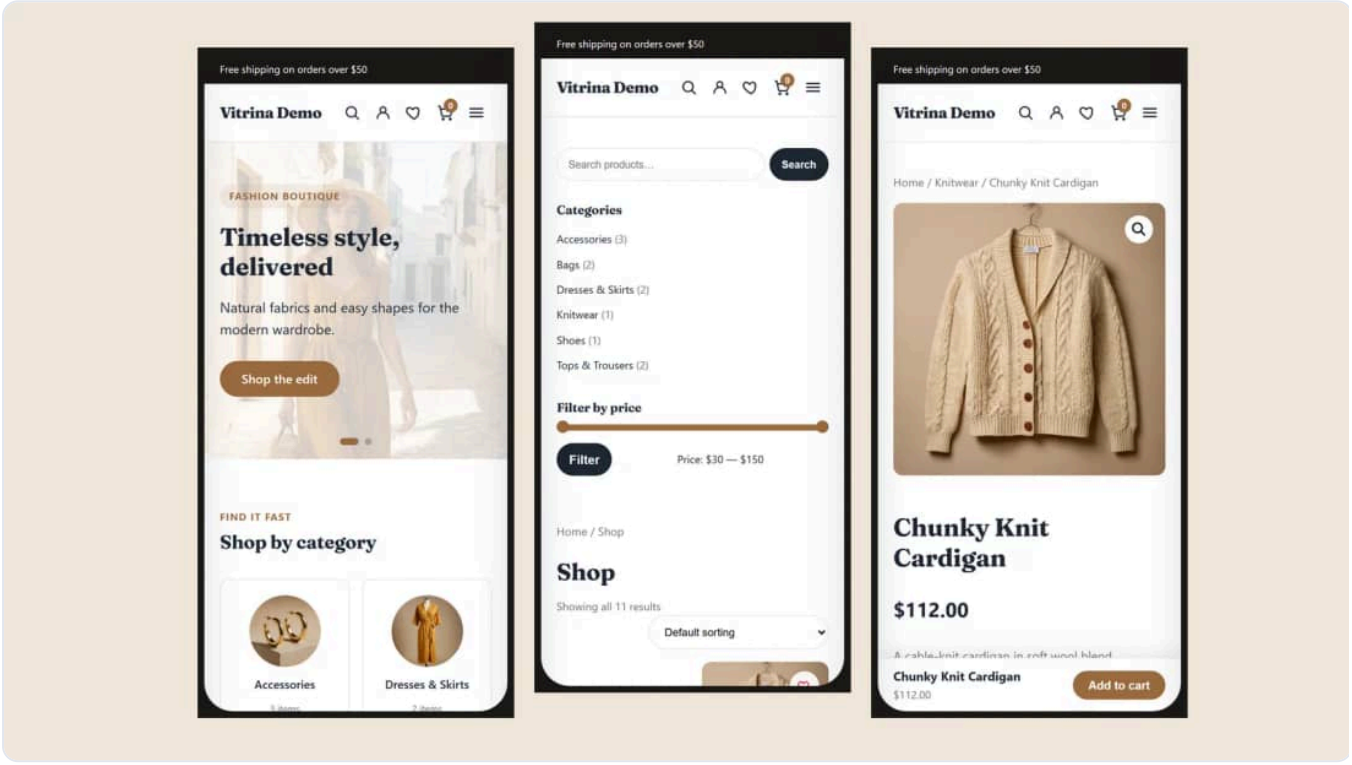

6 Quick View, wishlist and compare

1. Quick View, the wishlist heart and the Compare button appear on every product card with the Toolkit active.
2. The Compare page lines up to four products; the Wishlist page keeps shoppers' saved products.
3. Header icons show live counts for both.

7 Check on mobile and launch

1. Open your store on a phone: products show two per row, the menu opens from the menu button and the hero text sits on a light overlay.
2. Replace every sample product, image and text with your own before you launch.

Questions

The colours did not change after I picked new ones.

Make sure you clicked Publish in the Customizer. Version 1.1 fixed a bug where colour settings were overridden; update if you are on 1.0.

Why is there no countdown on the deal of the day?

The countdown runs to the end of the product's scheduled sale, or to the fallback date in Vitrina Options → Deal of the Day. Without an end date no countdown is shown.

Where do I put my own code?

Activate Vitrina Child and put CSS in its style.css and PHP in its functions.php, so Vitrina updates never overwrite your changes.

How do I update?

Upload the new vitrina and vitrina-toolkit folders over the old ones (or delete and re-upload). Your Customizer settings, products and pages are kept.

Support

Email codecraftlko@gmail.com with your order number. Your licence includes a year of updates and support (or lifetime updates with the Lifetime plan).
