Voltra — PrestaShop 8 Theme

Installation and setup guide

Voltra is a PrestaShop 8 theme for electronics, computer and gadget stores. It is a child theme of PrestaShop's Classic theme, so it keeps Classic's checkout, account pages and module support and changes the look.

In your download

- voltra.zip — the theme you upload to PrestaShop
- Installation-Guide.pdf — this guide
- README.txt and LICENSE.txt

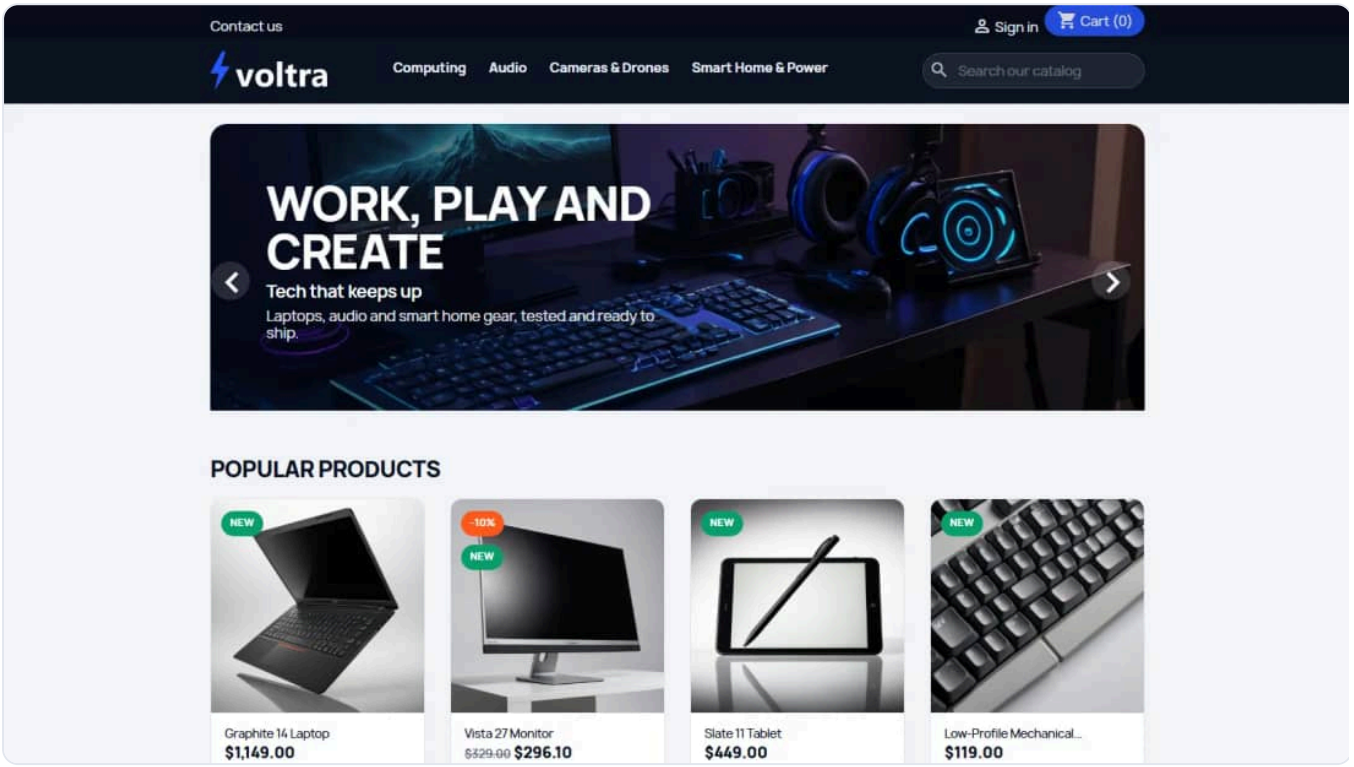

You will need

- PrestaShop 8.1 or newer (built and tested on 8.2.0)
- The Classic theme still in your themes folder (it ships with PrestaShop)
- About 20 minutes

Version 1.0.0 · October 2026 · Live demo: https://coodecraft.com/demos/voltra-prestashop-theme/index.html

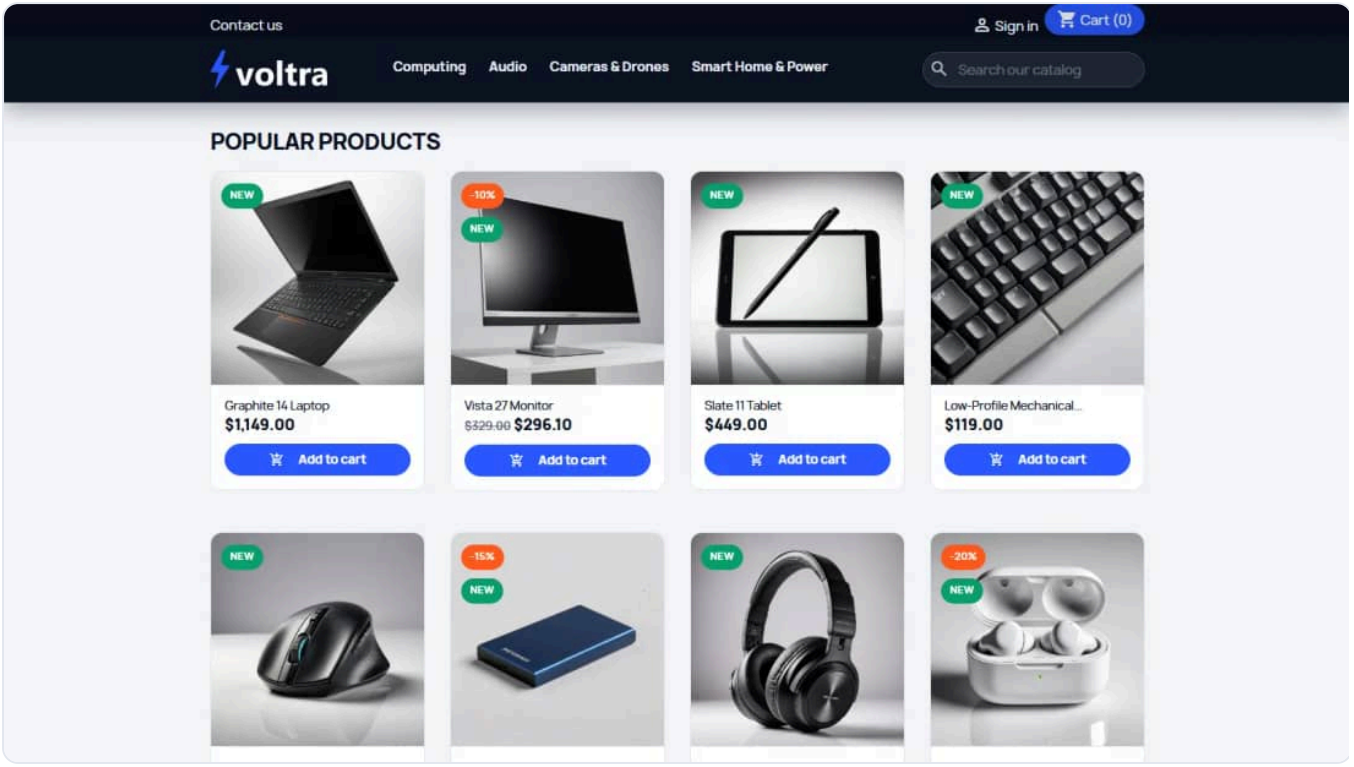

1 Upload the theme

1. In PrestaShop admin go to Design → Theme & Logo and click Add new theme.
2. Under Import from your computer choose voltra.zip from your download (not the outer download zip) and click Save.
3. Voltra now appears under My theme for your shop.

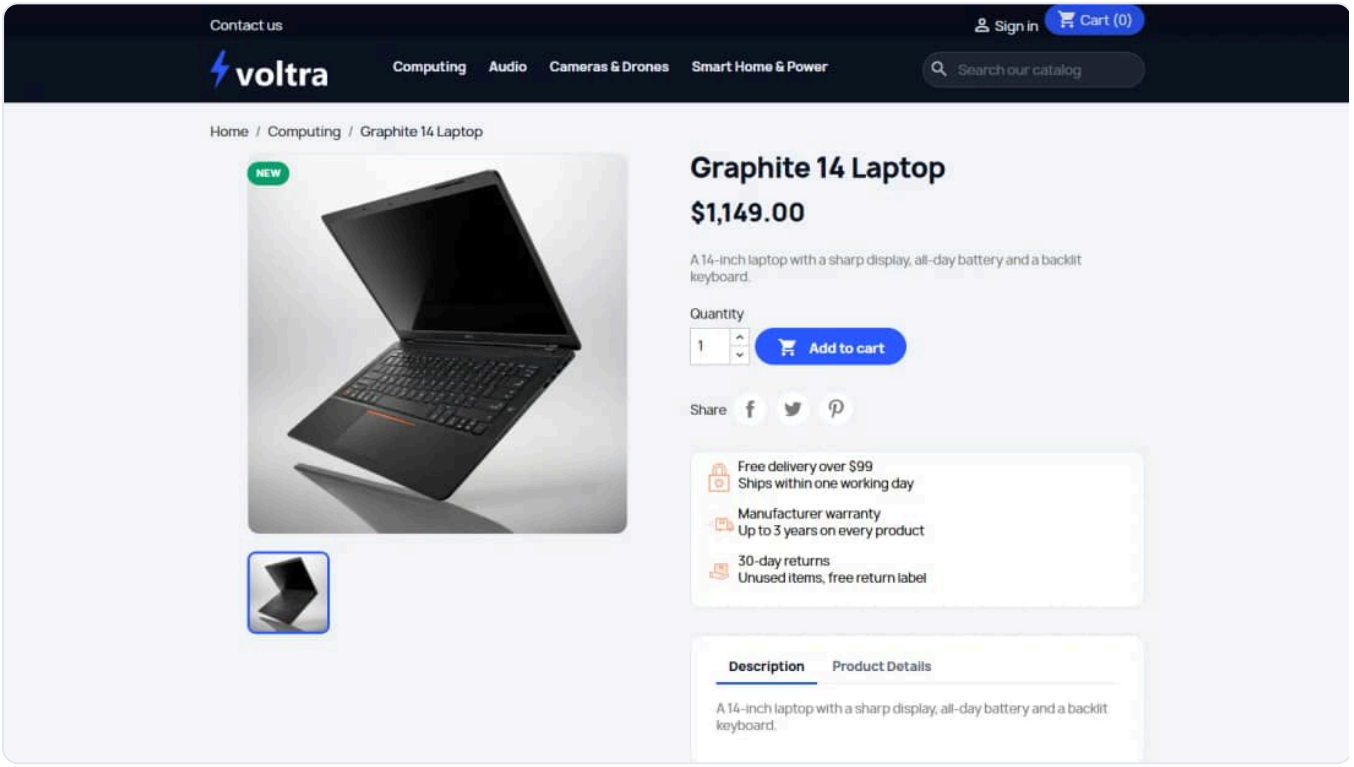

2 Use Voltra

1. Still in Design → Theme & Logo, point at the Voltra card and click Use this theme, then confirm.
2. PrestaShop switches the store to Voltra and sets JPEG image quality and a larger 400 × 400 product thumbnail.
3. Go to Design → Image Settings and click Regenerate thumbnails so existing product photos are resized for Voltra.

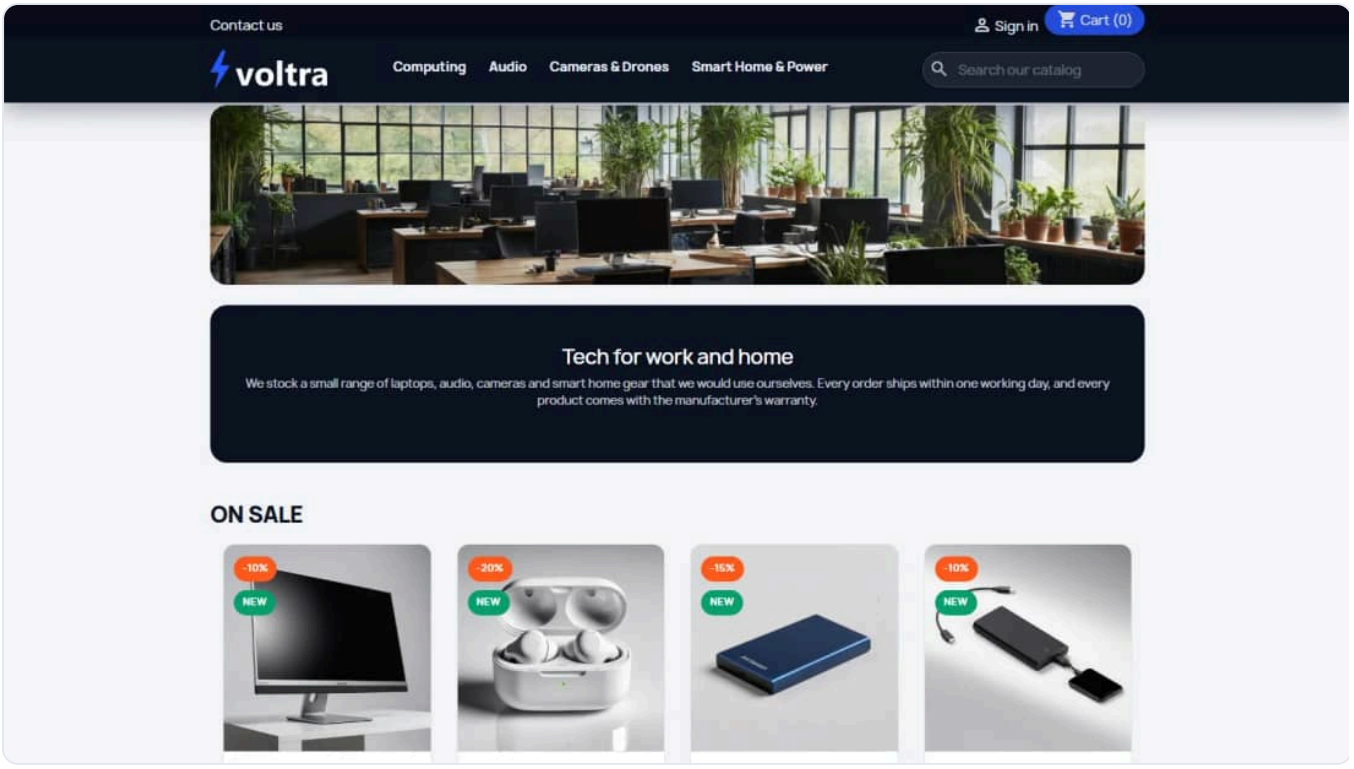

3 Logo and header

1. Voltra's header is dark, so upload a light or white logo in Design → Theme & Logo → Header logo.
2. The top menu is the Main menu module: choose its categories in Modules → Module Manager → Main menu → Configure.

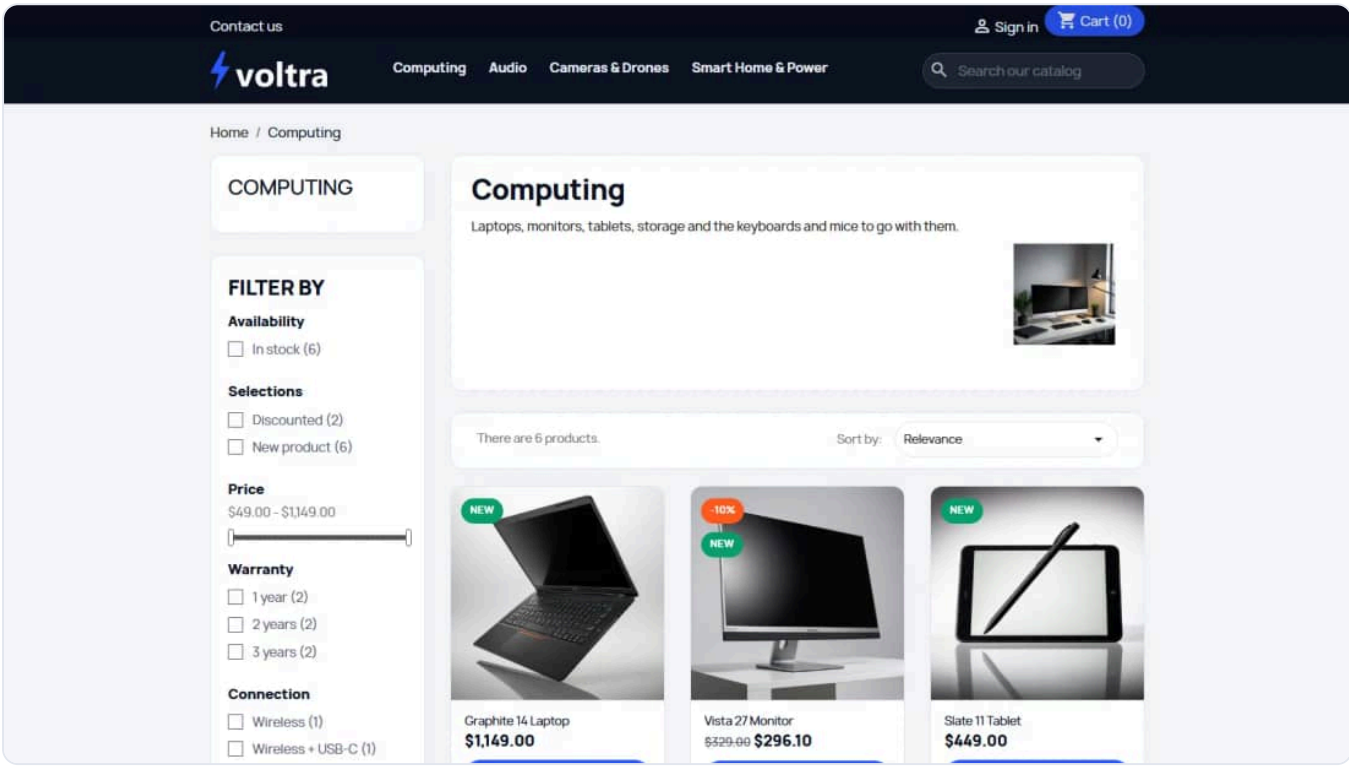

4 Home page content

1. The home page is built from PrestaShop's own modules: Image slider, Featured products, Banner, Custom text, Products on sale, New products and Best sellers.
2. Change slides in Modules → Image slider → Configure. Slides with a photo get a dark gradient so white text stays readable.
3. Featured products shows products in your Home category; add products to Home in Catalog → Products → Categories.

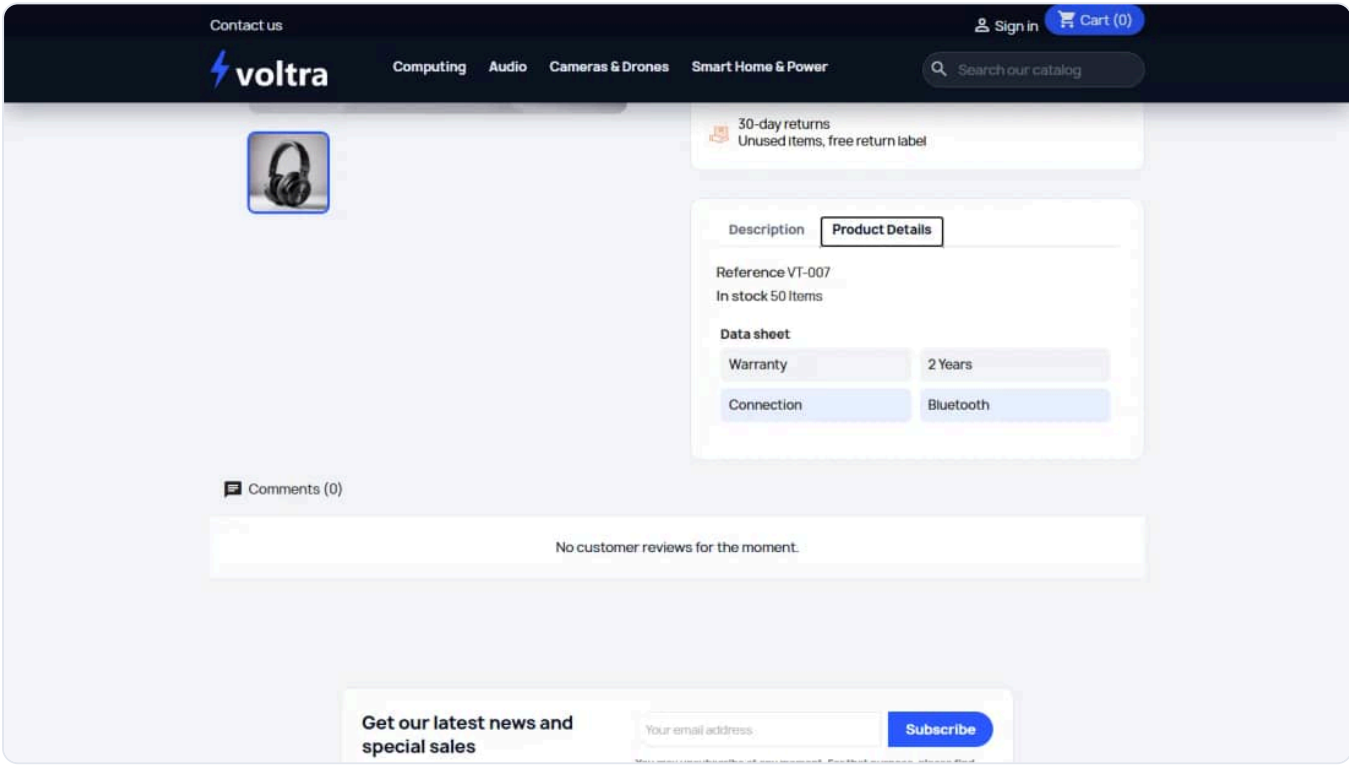

5 Listings, filters and Add to cart

1. Product cards show an Add to cart button for products that can be bought without choosing options; products with combinations or customisation show View options instead.
2. Filters come from the Faceted search module: in Modules → Faceted search, edit the filter template to include your categories and features, then rebuild the indexes.

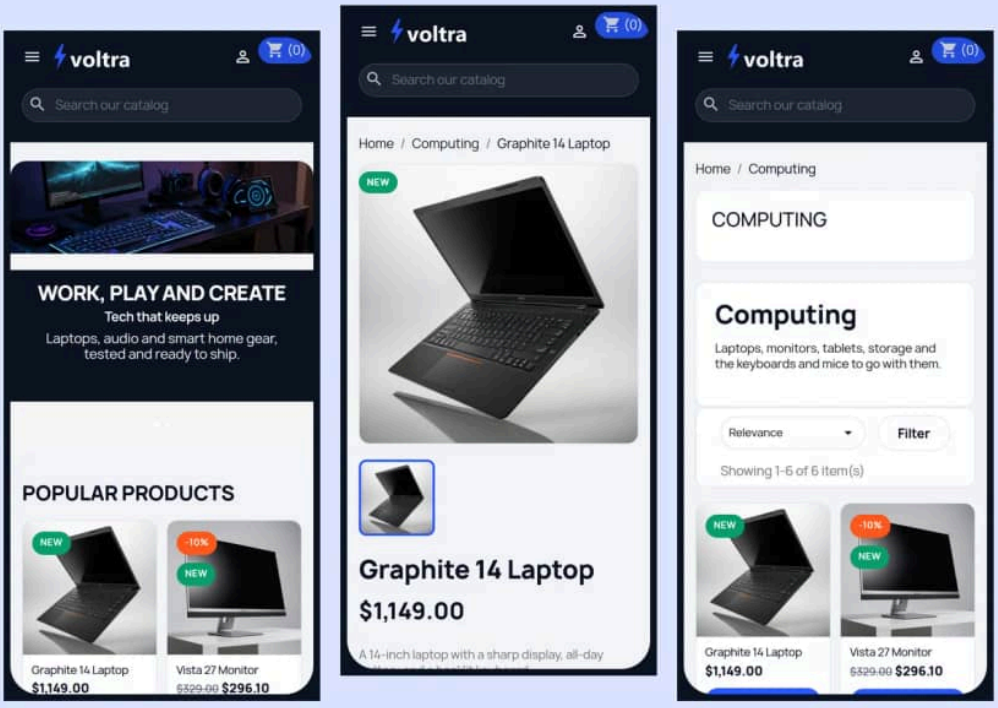

6 Specifications and policies

1. Add features (for example Warranty or Connection) in Catalog → Attributes & Features → Features; they appear in the Product Details tab.
2. Edit the three delivery, warranty and returns items in Modules → Customer reassurance.

7 Colours and mobile

1. To change colours, edit the variables at the top of themes/voltra/assets/css/custom.css (accent, header, sale and new colours).
2. Check your store on a phone: products sit two to a row and slider text moves under the photo.

Questions

Which PrestaShop versions does Voltra support?

PrestaShop 8.1 and newer 8.x versions. It was built and tested on PrestaShop 8.2.0. It does not support PrestaShop 1.7 or 9.

Do I need the Classic theme?

Yes. Voltra is a child theme and uses Classic's templates and scripts. Classic ships with PrestaShop; do not delete it.

Why do my product photos look blurry or small?

Voltra uses larger product thumbnails than Classic. Go to Design → Image Settings and click Regenerate thumbnails once after switching themes.

How do I update?

Keep a copy of any changes you made to custom.css. Copy the new files over themes/voltra on your server, or switch back to Classic, delete Voltra in Design → Theme & Logo, import the new zip and use it again. Your module settings and content are kept.

Can I change the colours without code?

Not from the admin. Colours are CSS variables at the top of custom.css; change the hex values and save.

Support

Email codecraftlko@gmail.com with your order number. Your licence includes a year of updates and support (or lifetime updates with the Lifetime plan).

The demo store's brand names and products are fictional samples. Product photos in the demo are not included in the theme.
